Springfield High School

2016-2017
Academic Programming and Scheduling Guide
The resource has been developed to provide students and parents/guardians with valuable information and tools to assist in the planning of their SHS academic career.

Students and parents/guardians can access this document on the SHS Web Page under the 2015-2016 Scheduling Tab

  • Dual and Concurrent Enrollment Courses
Career and Technical Education .......................................................... 64
Springfield High School is committed to preparing graduates for life after high school – “Commencement is the beginning . . .” Many of our graduates further their education by pursuing a post-secondary education at two and four year colleges and universities. Others enter military service, trade or technical schools or the work force, maybe even with certifications they have received from DCTS programs. Recognizing that the majority of our graduates will seek further education and/or training of some kind, we recommend that students develop their High School Plan around a sequence of courses that will maximize the potential to pursue rigorous and challenging post-secondary education opportunities. This plan can begin in 9th or 10th grade with specialized classes but most students focus in on a career path in 11th grade.

### Course Selection Guidelines

The course selection process is extremely important and plays a vital role in preparing students for their post-secondary endeavors. Course selection involves careful thought and planning and this process is a collaborative effort between counselors, teachers, students and parents. Parent conferences are also very helpful and welcomed by counselors. Call 610-938-6130, 7:30 a.m. – 3:00 p.m. for appointments during the school year or by email. The High School Guidance Counselors are:

- Colleen Grucella – Class of 2017
- Kelly Pedrotty – Class of 2018
- Jamie Weaver – Class of 2019
- Elizabeth Reilly – Class of 2020
- Kendra Campbell – College & Career Counselor

Springfield High School takes pride in a wide variety of academic and special area offerings. Students can pursue college preparatory along with highly rigorous honors and advanced placement courses in addition to exploring and experiencing many courses in the arts and technology application areas. Students are encouraged to take full advantage of these options. Throughout the course selection and scheduling process, please carefully read the course descriptions and expectations associated with each course. Working with your counselor, make sure the courses you select are in line with your academic plan. Choosing the right courses is one of the most significant tasks a student completes each year. Courses should be selected with these questions in mind:

- Will this course allow me to meet graduation requirements?
- Will this course help me to meet college entrance requirements?
- Will this course help me develop a skill to become employable after high school?
- Will this course introduce me to a new subject or experience?
- Is this course appropriate for my ability? Will it be a challenge?
- Do I have the prerequisite for this course?

Note: Requirements for graduation are on pages 9. Students must be sure they have all required courses each year. Every effort will be made to schedule all students with seven (7) credits comprised of scheduled courses, school service opportunities, internship/externship opportunities or independent studies. Senior students have additional scheduling opportunities.
Considerations when completing the course request process:

Preparing Course Requests
- A “Credit Tracker Form” will be distributed to students and is also available on the SHS web page under the Scheduling tab. Use HAC Transcript feature to view completed course and courses you are currently enrolled in this school year.

- A Grade Level “Course Selection Sheet” will also be distributed to students and is also available at the SHS web page under the Scheduling tab. These forms need to be completed with a high degree of accuracy because they will be used to enter course requests into the scheduling program. Students will be instructed on how to complete this process at our grade level scheduling meetings.

Course Sequencing
- Course sequencing must be adhered to when planning your program of study.
  - Planning charts are presented at the beginning of each core content area in this guide
  - It is important to review prerequisite course before requesting a course.

Prerequisites
- Prerequisites for courses should be carefully considered and adhered to when planning a program of study. Questions regarding appropriate placement related to prerequisites and qualifications should be directed to the student’s current teacher in that area or guidance counselor.
  - Most courses in the Academic Programming and Scheduling Guide (APSG) have percentage based prerequisites and some require teacher recommendation. Please keep in mind that these percentages are the initial screener in determining if a student has demonstrated the academic rigor to be successful in these more rigorous courses.
  - Where appropriate, performance requirements above and beyond College Preparatory courses are identified. Please consider these requirements when making your requests.
  - Before students complete the course selection process, teachers will make recommendations based on demonstrated academic ability and performance.
  - In some instances, a student does not meet the course pre-requisites, or display the recommended standards of academic performance, and as such is not recommended by a teacher. If a student still desires to take the course under these circumstances, the student and parent must complete a Course Recommendation Waiver Form available through guidance.

Course Offering Requirements
- Course may not be offered during the school year if an insufficient (fewer than 15) number of students request the course or if an insufficient number of students (fewer than 15) are able to be scheduled into the course.
- Students selecting rigorous academic course work, including Advanced Placement (AP) and Honors courses, must be aware of the commitment that the administration and Board of School Directors make to staff AP and Honors courses. Students are expected to honor their commitment to take these challenging courses. Please make sure that you are fully committed to these challenges because the withdrawing from an Honors or AP level course can have a significant impact on the college application and college acceptance process. Teachers will make recommendations for Honors and AP courses based on student ability and performance. Counselors will guide you through the selection and commitment process so that you are confident in your decision to pursue these courses.

Note: AP course offerings in particular may be eliminated if not requested by a sufficient number of students. Additionally, when scheduling is completed, an AP course can be removed from the schedule if an insufficient number of students are enrolled in the course.

The Master Schedule
- Students are given opportunities to choose from a wide variety of courses beyond the required courses listed in this guide. Every effort is made to fulfill these requests; however, it is difficult to provide every course that every individual student requests. The development of a master schedule takes into consideration many factors when determining which courses can be offered. Staffing, the number of students requesting a particular course, unique combinations of course requests, and school resources are among many factors that influence the course offerings courses in a given year. HS administration and guidance will work diligently and methodically to provide a rich and varied academic
experience, but there may be some instances where, for scheduling purposes, the administration and guidance staff may need to enroll students in courses they did not request. If this occurs, every effort will be made to place the student in a similar course at a similar level. That is why it is important for students to list an adequate number of electives and alternatives to insure they are scheduled into courses aligned with their academic goals and interests.

### Acceleration and Course Exemption

Periodically students wish to accelerate through a course sequence to advance to the next level for a variety of reasons. The guidelines for these opportunities are as follows:

1. A request to exempt a course by exam is to be initiated by parent and student, in writing, to the principal; the letter must clearly state reason for the exemption request. Exemption by exam must be requested prior to the start of the course. Permission to exempt a course by exam is granted at the principal’s discretion.
2. Any costs are to be funded by the student and/or parents, which may include the costs of assembling materials, and administering and scoring the exams.
3. The student must take the district mid-term and final examinations for the course and achieve a score of 85% or better. These examinations need to be taken and evaluated at least 2 weeks before the start of the course.
4. No grade will be assigned or included in the GPA.
5. No credit will be awarded for the course.
6. If the criteria in Step 3 are met, the course will be listed on the transcript as “Course by Exemption” and will be awarded a passing mark of “P”.
7. The scheduling of the mid-year and final examinations dates and administration/scoring will be arranged by the building principal or his/her designee.

### Guidelines for Changing Scheduled Courses

Student schedules will be reviewed and revised by counselors and students. Schedules will be available to students before the start of the 2015-2016 SY. These changes should be completed before the end of the school year or during the summer. Students requiring or requesting a schedule change must do so by accessing the On-Line Course Change Request form at [https://apps.ssdcougars.org/public.php?app=courseSelection](https://apps.ssdcougars.org/public.php?app=courseSelection). This form will be the primary means by which counselors will review and make schedule changes. If you cannot access this form, contact the Guidance Office at 610-938-6130. Parents/guardians and students should know that counselors may not check or reply to emails and phone messages during summer break. However, they do monitor the change request entries frequently and will reply and make changes before the start of the school year. With that in mind, students and parents are required to enter all course request changes on-line. This system has proven to be very efficient and effective. It is not necessary or recommended that an email and/or phone message are left in addition to the on-line request. This creates redundant work for the counselors and may slow the process of making changes which impacts all students.

### Initial Drop/Add Period

Students recommended for and meeting the prerequisite academic standards to be enrolled in Advanced Placement courses must notify their counselor before August 1 if they no longer wish to remain in the AP course. Students enrolled in AP courses after this date will be maintained on the AP class list and must complete the course.

Students enrolled in courses other than AP must submit a request to the counselor by August 19, 2016 to be removed from a course without penalty. If a student wishes to drop a course after the start of the school year, the drop/add procedure below will be followed.

### Procedures for Dropping/Adding Courses – After Initial Drop/Add Period

Periodically students request to drop a course after the initial add/drop period in the beginning of the school year or 2nd semester. When these situations arise, the following steps must be taken prior to an administrator’s consideration of a course change:

- The student and parent must submit the request in writing and clearly state the reason and/or rationale. This request must be submitted to the teacher and the counselor.
• Once the teacher and counselor have received and reviewed the request, the following will occur:
  ◦ The counselor will issue the student and the parent the Course Drop Procedure Form to insure they are aware of
    the request to drop the class unless the request was initiated by the parent
  ◦ The counselor will arrange a meeting with the student and the teacher to review the request and determine if the
    student is:
    ▪ Attending regularly and actively engaging in classwork
    ▪ Completing in-class work and HW assignments
    ▪ Maintaining an organized notebook and planner
    ▪ Exhibiting good study habits
  ◦ The teacher, counselor and student will develop a plan of action that must include at least a minimum of 5
    documented before/after school sessions with the teacher or tutor over a 3 week period
  ◦ The teacher must contact the parent to discuss the situation
    ▪ The parent will be asked to share information about home study habits and efforts that will be made at
      home to address the issue
    ▪ Teacher will share efforts that have been made in the classroom with regards to instruction & assessment
      strategies, and interventions (Use SHS Student Feedback Checklist)
• If all of these steps have been followed, the student is still not making adequate academic progress, and the drop request is
  still being proposed, then a meeting with the counselor and administrator must be arranged to review the situation. Once
  all information is reviewed, the counselor and administrator will arrange a meeting with the student, parent and teacher to
  present their recommendation. If the decision is made to drop the course, a withdrawal code “WF” will appear on the
  students transcripts based on the final recommendation.

*** Note: Additional measures will be taken for seniors and will include contacting a potential
college or one for which acceptance has been granted.

---

Promotion Requirements

To be promoted to the 11th grade, students must have earned a minimum of 11 credits by the end of the 10th grade. Six (6) of these
credits must be in the core academic areas of LA, SS, Math and Science. Students who do not meet the promotion requirement will
remain with their guidance counselor and advisory and will be designated as a sophomore.

---

Repeating Courses and Summer School

If a student fails a core course, they have the option to repeat the course(s) the following school year or attend Summer School. Counselors will assess these situations and make a recommendation that is in the student’s best interest academically. Repeating courses can be beneficial, especially with courses that build on prior knowledge. Sometimes scheduling constraints are such that repeating a course creates difficulty in scheduling. In these cases the student is encouraged to attend Summer School. Please contact the Guidance Office for specifics regarding qualifications for summer school, grading procedures, available courses, dates, and tuition.

Failing any course may impede or jeopardize a student graduating within four (4) years. Students and parents/guardians are strongly encouraged to make necessary and appropriate arrangements in the event of a course failure.

---

Weighted Courses

A student can be enrolled in College Preparatory, Honors or Advanced Placement courses. Due to the higher academic rigor of
Honors and AP courses, a heavier weight is assigned to these courses when calculating a student’s GPA. College Prep courses carry a
weight of 1.00, Honors a weight of 1.125 and AP a weight of 1.25.

Students enrolled in an AP course must sit for the AP Exam to receive AP weight (1.25) at the conclusion of the course. If a student
does not sit for the AP Exam, the student will be awarded Honors weight (1.125) at the conclusion of the course and must take the
final examination in that course.
GPA Calculation

All MP and Final grades will be recorded and reported as a numerical value. Students can use the following method to calculate GPA:

- Determine Total Quality Points - sum of all points for each course attempted as determined by the following formula:

  \[
  \text{Quality Points per Course} = \% \text{ Grade earned in course} \times \text{Credit} \times \text{Weighted Value}
  \]

  \[
  \text{Overall GPA} = \frac{\text{Total Quality Points}}{\text{Credits Attempted}}
  \]

Class Rank

Class rank is calculated at the end of the school year and is based on the overall weighted GPA. Student MP Report Cards include class rank but this is an un-weighted calculation and is not a true indication of the student’s class rank.

National Honor Society

Requirements for consideration for elections in the NHS include:

- Junior or Senior
- 95.0000 weighted Cumulative GPA or higher the summer before Junior or Senior Year
- Enrolled in 3 or more Honors/AP courses during the school year in which application is made (invitations are mailed in August and applications are submitted in September)

More details will be shared in the invitation/application materials.

Delaware County Technical Schools Programs

A complete list of the courses offered by Delaware County Technical Schools is provided beginning on page 62. The Delaware County Technical Schools program is offered to 11th and 12th grade students at the Intermediate Unit Vocational Technical Schools. The training at the schools is extensive and demanding and provides a graduate with an excellent background for technical careers. The Technical Schools Program is offered as a half-day AM or PM program and the school district provides transportation to and from the Technical School. To enroll, students should meet with their guidance counselor to complete the Technical Schools application. Students and their parents are encouraged to visit the Delaware County Technical Schools. Call for an appointment: Folcroft (610) 583-7620 or Aston (610) 459-3050.
HONORS & ADVANCED PLACEMENT COURSES - Springfield High School offers intensive studies that require extensive independent preparation and a strong commitment to meeting high demands for critical, creative, and analytical work.

| Language Arts: | Honors Language Arts courses are offered at all grade levels to students interested in developing skills necessary to prepare for Advanced Placement (AP) English Language and Composition and/or AP English Literature and Composition. |
| Mathematics: | The accelerated student enrolls sequentially in the Honors Mathematics program which provides the necessary foundation to prepare students for enrollment in our Advanced Placement Statistics and Calculus courses. |
| Science: | Students interested in pursuing an intensive science program requiring extensive independent learning and preparations are encouraged to participate in the Science Academy. Students enter in to an accelerated science program that culminates with the completion of multiple AP level courses. |
| Social Studies: | Honors Social Studies courses are offered at all grade levels to students interested in developing skills necessary to prepare for AP American History, AP European History, AP American Government and/or AP Psychology. |
| World Language: | Students with the appropriate level of exposure to a foreign language at the middle school level will be allowed to enroll in upper level language courses at the high school level and accelerate their progression through our course offerings. |
| Advanced Placement Courses: | Springfield High School offers a wide variety of AP classes across various departments. These are rigorous, first-year college level courses whose descriptions and examinations are prepared and approved by the College Board. Through completion of the courses and the Advanced Placement Examinations offered in May, students have the opportunity to earn college credits or advanced standing in a college curriculum. Enrollment in an Advanced Placement course requires evidence of superior skills in reading comprehension, writing, listening, logic, and problem solving. Evidence of academic success, teacher recommendations, and in some cases preliminary assignments is required for placement in these courses. The pacing and workload in Advanced Placement courses requires a high level of commitment from students. |

AP Potential

College Board data indicates that hundreds of thousands of high school students have the potential to succeed in Advanced Placement courses but never take AP courses.

AP Potential is a free web-based tool used by schools to help identify students with the potential to achieve success in AP. Research indicates that PSAT scores predict performance on specific AP exams more accurately than more traditional methods.

There are many benefits to taking Advanced Placement courses while in high school. Students who take AP courses, regardless of exam score, are more likely to be successful their first year of college than students who have never taken an AP course. In addition, students who earn a 3 or higher on their AP exams are more likely to achieve success in college and graduate with a college degree. Advanced Placement courses give high school students a college course experience while they are still in high school and offer the rigor that is desired by colleges in the college admissions process. There is also the benefit of potentially earning college credit at a fraction of the cost of taking a college course in college.

Because we believe in the many benefits of the Advanced Placement program, students identified through their PSAT scores to be likely to achieve success in one or more Advanced Placement Programs will receive a letter from the College Board indicating this.

PSAT scores are only one indicator of success. Not receiving an AP Potential letter from the College Board does not mean a student will not be successful. We encourage all students to challenge themselves and take courses that will enrich their learning experience.
### Divisions I & II Initial Eligibility Requirements

**DIVISION I**

| 16 Core Courses:                                                                 | 16 Core Courses | 16 Core Courses |
|--------------------------------------------------------------------------------|-----------------|-----------------
| 4 years of English.                                                            | 3 years of English | 2 years of mathematics (Algebra I or higher) |
| 3 years of mathematics (Algebra I or higher).                                  | 2 years of mathematics (Algebra I or higher) | 2 years of natural/physical science (1 year of lab) |
| 2 years of natural/physical science (1 year of lab)                           | 2 years of natural/physical science (1 year of lab) | 3 years of additional English, mathematics or natural/physical science |
| 1 year of additional English, mathematics or natural/physical science.         | 3 years of additional English, mathematics or natural/physical science | 2 years of social science. |
| 2 years of social science.                                                     | 2 years of social science. | 4 years of additional courses (from any area above, foreign language or comparative religion/philosophy). |
| 4 years of additional courses (from any area above, foreign language or comparative religion/philosophy). | 4 years of additional courses (from any area above, foreign language or comparative religion/philosophy). | |

* Beginning August 1, 2018 NCAA Division II will require students to earn a minimum 2.2 GPA in core courses and earn an SAT combined score or ACT sum score that matches your core course GPA on the Division II competition sliding scale.

For NCAA eligibility purposes, only NCAA designated “core courses” are used in the calculation of the NCAA GPA. This is an NCAA policy and is not related to Springfield High School Grading Policy. Be sure to look at your high school’s list of NCAA-approved core courses at [www.eligibilitycenter.org](http://www.eligibilitycenter.org) to make certain that you know which of your courses will be counted toward your NCAA GPA.

Division I and Division II GPA and SAT/ACT test score requirements are based on a sliding scale determined by the NCAA and can be found at [www.eligibilitycenter.org](http://www.eligibilitycenter.org).

Please refer to [www.eligibilitycenter.org](http://www.eligibilitycenter.org) for complete and updated information.
Graduation Requirements

In order to graduate and earn a diploma from Springfield HS, all must meet the following requirements:

1. Successfully complete and earn credit for courses as detailed in the table below.

2. Demonstrate proficiency on Keystone Examinations in the areas of Algebra I, Biology and English Literature. These exams will be administered near the end of the completion of the course.
   i. Students that do not demonstrate proficiency on the Algebra I, Biology, and English Literature Exams will be required to complete a project-based assessment for each subject area for which they do not demonstrate proficiency.
   ii. Students will be scheduled for this course(s), and the course(s) will take the place of elective courses in the student’s schedule

## 10th Grade
### Core and Elective Class Offerings

#### Language Arts:

**Core Requirements**
- CP LA II
- Honors LA II

**Elective Courses**
- Creative Writing
- Journalism
- Literature and Film

#### Social Studies:

**Core Requirements**
- CP US Civics and Government
- H US Civics and Government
- AP United States Government and Politics
- AP Human Geography

**Elective Courses**
- Contemporary Issues
- Civil and Criminal Law
- Psychology
- From Gutenberg to Google

#### Science:

**Core Requirements**
- CP Chemistry
- H Chemistry

**Elective Courses**
- Planet Earth
- Comparative Anatomy and Physiology
- Meteorology
- Astronomy
- Forensic Science

#### Mathematics:

**Core Requirements**
- CP Algebra II
- H Algebra II
- CP Geometry
- H Geometry
- CP Pre-Calculus
- H Pre-Calculus

#### World Languages:

**Core Requirements**
- French I
- French II
- German I
- German II
- Spanish I
- Spanish II
- Spanish III
- Latin I

#### Computer Applications & Business Education:

- Introduction to Web Design
- Web Design II
- Desktop Publishing
- Photoshop I
- Photoshop II
- Computer Applications
- Introduction to Programming
- Emerging Technologies/Tech Support
- Introduction to Business
- Marketing
- Money Management
- Accounting I

#### Communications & Video Production:

- Television Production: Multi-Camera Production
- Television Production: Film-Style Production
- Broadcast Journalism
- Public Speaking
- Introduction to Acting
- Advanced Acting
- Principles of Leadership

#### Family and Consumer Science:

- Fundamentals of Foods and Nutrition
- Focus on Foods and Nutrition
- Advanced Food Preparation
- The Science of Food
- Interior Design and Housing
- Child Development
- Child Development II: Preschool

#### Art:

- Studio Art
- Drawing & Design
- Painting & Drawing
- Honors Art
- Printmaking
- Functional Ceramics
- Sculptural Ceramics
- Tile Making
- Primitive Ceramics
- Sculpture
- Special Effects Photography
- Portrait Photography
- Digital Photography

#### Industrial Technology:

- Industrial Materials I
- Industrial Materials II
- Architectural Design I
- Engineering: Structural Design
- Fabrication Technology: Robotics
- Graphic Arts & Design I
- Graphic Arts & Design II
- Digital Painting and Illustration

#### Music:

- Music, Interactive Media & Your World
- Music Production I
- Symphonic Band
- Orchestra
- Symphony Orchestra/Band
- Concert Choir
- Springfield Singers
- AP Music Theory
### 11th Grade — Core and Elective Class Offerings

#### Language Arts:
- **Core Requirements**
  - 131 CP LA III
  - 130 Honors LA III
  - 139 AP Language and Composition
- **Elective Courses**
  - 127 Writing Fiction
  - 128 Advanced Writing Fiction
  - 150 Journalism
  - 151 Literature and Film
  - 160 Journalism II

#### Social Studies:
- **Core Requirements**
  - 223 CP US History II
  - 222 Honors US History II
  - 225 AP United States History
- **Elective Courses**
  - 252 African American Experience
  - 253 Contemporary Issues
  - 254 Civil and Criminal Law
  - 255 Psychology
  - 256 AP Psychology
  - 257 From Gutenberg to Google
  - 258 Know Your Rights
  - 265 AP Human Geography

#### Science:
- **Core Requirements**
  - 321 CP Chemistry
  - 331 CP Physics
  - 330 H Physics 355 AP Physics I
- **Elective Courses**
  - 325 General Organic and Biochemistry
  - 350 AP Biology
  - 351 AP Chemistry
  - 356 AP Physics 2
  - 361 Planet Earth
  - 362 AP Environmental Science
  - 365 Comparative Anatomy & Physiology
  - 366 Human Anatomy & Physiology
  - 373A Meteorology
  - 374 Astronomy
  - 379 Forensic Science

#### Mathematics:
- **Core Requirements**
  - 421 CP Geometry
  - 420 H Geometry
  - 459 CP Pre-Calculus
  - 458 H Pre-Calculus
  - 442 H Discrete Mathematics
  - 460 CP Calculus AB
  - 461 AP Calculus BC
- **Elective Courses**
  - 445 Probability and Statistics
  - 450 AP Statistics

#### World Languages:
- **Core Requirements**
  - 501 French I
  - 502 French II
  - 503 French III
  - 531 German I
  - 532 German II
  - 533 German III
  - 521 Spanish I
  - 522 Spanish II
  - 523 Spanish III
  - 525 H Spanish IV

#### World History:
- 236 World History
- 237 Eastern Europe & Russia
- 238 Latin America
- 239 Africa

#### Social Studies:
- **Core Requirements**
  - 705 American Government
  - 706 American Politics
  - 720 AP US History
  - 721 AP World History
  - 722 AP U.S. History II
  - 723 AP World History II

#### Elective Courses
- 724 AP U.S. History
- 725 AP World History
- 726 AP U.S. History
- 727 AP World History

#### Elective Courses
- 728 AP Studio Art: 2D Design
- 729 AP Studio Art: 3D Design
- 730 Digital Photography
- 731 Graphic Design
- 732 Graphic Design
- 733 Graphic Design
- 734 Digital Painting and Illustration

#### Family and Consumer Science
- 601 Fundamentals of Foods and Nutrition
- 602 Focus on Foods and Nutrition
- 603 Advanced Food Preparation
- 605 The Science of Food
- 611 Interior Design and Housing
- 620 Child Development
- 621 Child Development II: Preschool
- 640 Real World: Managing Relationships & Money
- **Art**
  - 801 Studio Art
  - 803 Drawing & Design
  - 805 Painting & Drawing
  - 807 Honors Art – TEACHER REC
  - 809 Printmaking
  - 811 Functional Ceramics
  - 813 Sculptural Ceramics
  - 815 Tile Making
  - 817 Primitive Ceramics
  - 819 Sculpture
  - 824 Special Effects Photography (formerly Multi Design Photo)
  - 826 Portrait Photography (formerly Creative Portraiture)
  - 827 Digital Photography
  - 827 Digital Photography
  - 828 AP Studio Art: 3D Design – TEACHER REC
  - 829 AP Studio Art: 2D Design – TEACHER REC
  - 829H Honors Photography

#### Industrial Technology
- 701A Industrial Materials I
- 702 Industrial Materials II
- 703 Industrial Materials III
- 710 Architectural Design I
- 715 Engineering: Structural Design
- 716 Fabrication Technology: Robotics
- 731A Graphic Arts & Design I
- 732 Graphic Arts & Design II
- 733 Graphic Arts & Design III
- 734 Digital Painting and Illustration

#### Health and Physical Education
- 036 HE/PE
- 041 Advanced HE/PE

#### Vocational/Technical Offerings
- **Delaware County Technical School**
  - See details in Programming Guide
  - Pages 62-70
- **Delaware County Community College**
  - See details in Programming Guide
  - Pages 62-70

#### College Credit Offerings
- Dual Enrollment Courses
- Concurrent Enrollment Courses

The Language Arts program at Springfield High School integrates all the language arts skills—reading, writing, speaking, listening, thinking, and researching—into the curriculum and helps students apply these skills to meaningful tasks. Our program goal is to have students achieve high academic standards goals in the language arts: reading independently, reading critically, analyzing and responding to literature, writing in various forms for a variety of audiences, producing compositions of high quality, speaking proficiently, and using research skills. Students at all grade levels will be expected to know and meet district and state standards in reading, writing, speaking and listening. Technology is infused into each course in a deliberate and meaningful fashion.

110  H Language Arts (I): Foundations of Literature /Honors

1.0 credit  Language Arts Credit  Grade: 9
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
Grade of 84% or higher in 8th grade language arts plus or
Grade of 94% or higher in 8th grade language arts

In Language Arts (I) Honors, students will be introduced to and study various genres of fiction and non-fiction, and they will learn the necessary skills specific to each type of reading. To enhance their understanding and appreciation of the literature, students will discover the relationship between the works and their respective time periods and cultures. Texts include, but are not limited to: The Odyssey, Romeo and Juliet, Lord of the Flies, “A Modest Proposal,” Romantic poetry, Things Fall Apart, and All Quiet on the Western Front. In conjunction with and in addition to the reading, students will employ the writing process and write extensively in various modes, ranging from formal literary analysis to persuasion and poetic response. Reading and writing skills will be assessed daily for development with a goal of demonstration of mastery. Grammar and vocabulary development via the Sadlier Vocabulary Workshop program (Level E) are also stressed.

In Honors level classes, students must be self-motivated, possess strong writing skills, and be able to work through challenging texts independently. They will be required to read and write more extensively and in more depth, and they can expect a greater demand for homework responsibilities.

Language Arts (I) Honors requires the following additions to/variants from the College Preparatory level:

- A summer reading assignment for a required text.
- Homer’s The Odyssey (in lieu of Greek myths).
- Two to three additional texts, including a Shakespearean comedy.
- Two to three additional writing pieces or projects.

111  CP Language Arts (I): Survey of Literature /College Preparatory

1.0 credit  Language Arts Credit  Grade: 9

In Language Arts (I) College Preparatory, students will be introduced to and study various genres of fiction and non-fiction, and they will learn the necessary skills specific to each type of reading. To enhance their understanding and appreciation of the literature, students will discover the relationship between the works and their respective time periods and cultures. Texts include Ancient Greek myths, Romeo and Juliet, Lord of the Flies, satire, Romantic poetry, and A Raisin the Sun. In conjunction with and in addition to the reading, students will employ the writing process and write extensively in various modes, ranging from formal literary analysis to persuasion and poetic response. Reading and writing skills will be assessed daily for development with a goal of demonstration of mastery. Grammar and vocabulary development via the Sadlier Vocabulary Workshop program (Level D) are also stressed.

120  H Language Arts (II): The American Experience /Honors

1.0 credit  Language Arts Credit  Grade: 10
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
Grade of 84% or higher in 110 or
Grade of 94% or higher in 111

Language Arts (II) Honors will examine how American writers have represented and interpreted the American experience through their works. The course intends to provide students with an exposure to the social, economic and cultural events that have shaped and defined our values and our goals as a nation. The development of the course may be thematic or chronological. Students in the Honors level classes will read from American writers including Arthur Miller, John Steinbeck, and Harper Lee. In addition to the study of literature, students will have opportunities to employ the writing process in a variety of writing modes. Grammar, usage, mechanics, and vocabulary via the Sadlier Vocabulary Workshop program (Level F) will be studied and developed. This course will place an emphasis in preparing students for taking the Keystone Literature Exam. Assessment methods vary and include oral, written, multi-media and group presentations.

In Honors level classes, students will be required to read and write more extensively and in more depth and can expect a greater demand for homework responsibilities and independent preparation.

Language Arts (II) Honors requires more of the following than in the College Preparatory level:

- Analytical writing,
Language Arts (II) College Preparatory will examine how American writers have represented and interpreted the American experience through their works. The course intends to provide students with an exposure to the social, economic and cultural events that have shaped and defined our values and our goals as a nation. The development of the course may be thematic or chronological. Students in Academic level classes will read from American writers including Arthur Miller, Mitch Albom, John Steinbeck, and Harper Lee. In addition to the study of literature, students will have the opportunity to employ the writing process in a variety of writing modes. This course will place a heavy emphasis in preparing students for taking the Keystone Literature Exam. Grammar, usage, mechanics, and vocabulary development via the Sadlier Vocabulary Workshop (Level E) will be studied. Assessment methods vary and include oral, written, multi-media and group presentations.

Language Arts (III) Honors builds upon the 10th grade literature experience. This course moves students from an American outlook on the 20th century to a global perspective. Through this global exposure to modern world literature, students explore the human condition in light of the cultural implications found in novels, short stories, poetry, plays, and memoirs from throughout the world, including the Middle East, Asia, Africa and Latin America. In addition to the study of literature, this course focuses on college preparation, including an emphasis on the development of college level writing and literary analysis, MLA format, vocabulary development via the Sadlier Vocabulary Workshop program (Level G), and independent reading and writing. Assessment methods vary and include written, multi-media and group presentations.

In Honors level classes, students will be required to read and write more extensively and in more depth and can expect a greater demand for homework responsibilities and independent preparation.

Language Arts (III) Honors requires more of the following than in the College Preparatory level:

- Two summer reading books and assessments
- Extensive fiction and non-fiction reading
- Emphasis on college level writing, developing mature and sophisticated writing style
- More homework responsibilities

Language Arts (III) College Preparatory builds upon the 10th grade literature experience. This course moves students from an American outlook on the 20th century to a global perspective. Through this global exposure to modern world literature, students explore the human condition in light of the cultural implications found in novels, short stories, poetry, plays, and memoirs from throughout the world, including the Middle East, Asia, Africa and Latin America. In addition to the study of literature, students will employ the writing process in a variety of modes, including narrative, informational, and persuasive. Grammar, usage, mechanics, and vocabulary development via the Sadlier Vocabulary Workshop program (Level F) will be stressed. Assessment methods vary and include oral, written, multi-media and group presentations.
139  **Advanced Placement English Language and Composition**

1.0 credit  Language Arts Credit  Grade: 11

Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:

- Grade of 90% or higher in 120 or
- Grade of 94% or higher in 121

The AP English Language and Composition course is designed to help students become skilled readers of prose written in a variety of rhetorical contexts and to become skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer’s purposes, audience expectations, and subjects as well as the way generic conventions and the resources of language contribute to effectiveness in writing. To this end, grammar instruction is a strong component of the course. Students will have opportunities to write about a variety of subjects and to demonstrate an awareness of audience and purpose. The overarching objective is to enable students to write effectively and confidently across the curriculum and in their professional and personal lives. Another purpose of the AP English Language and Composition course is to enable students to read complex texts from many disciplines and historical periods with understanding and to write prose of sufficient richness and complexity to communicate effectively with mature readers. To reflect the increasing importance of graphics and visual images in texts published in print and electronic media, students are asked to analyze how such images both relate to written texts and serve as alternative forms of texts themselves. Vocabulary development will be addressed via the Sadlier Vocabulary Workshop program (Level G). Students must take the Advanced Placement Exam in order to earn the AP grade weight.

140  **H Language Arts (IV): Epics, Classics & Contemporaries /Honors**

1.0 credit  Language Arts Credit  Grade: 12

Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:

- Grade of 84% or higher in 130 or
- Grade of 94% or higher in 131

In Language Arts (IV) Honors, students will develop an understanding and appreciation of major works of classical and modern literature. Works may include *Oedipus Rex, Antigone, A Doll's House, Macbeth and/or Hamlet*. The course will weave in a variety of supplementary texts that enhance student comprehension of core texts. The course will center on various types of writing including argument, analysis, and evaluation. The students will engage in the writing process through critical analysis of the text, drafting an argument, and working through the revision process. Other areas of study include literary criticism, vocabulary acquisition via the Sadlier Vocabulary Workshop program (Level H), mechanical expression, and literary analysis. *In Honors level classes, students will be required to read and write more extensively and in more depth and can expect a greater demand for homework responsibilities and independent preparation.*

**Language Arts (IV) Honors requires more of the following than in the College Preparatory level:**

- One summer reading book and two assessments
- Extensive fiction and non-fiction reading
- Emphasis on college level writing, developing mature and sophisticated writing style
- More homework responsibilities

141  **CP Language Arts (IV): Epics, Classics & Contemporaries /College Preparatory**

1.0 credit  Language Arts Credit  Grade: 12

In Language Arts (IV) College Preparatory, students will develop an understanding and appreciation of major works of classical and modern literature. Works may include *Oedipus Rex, Antigone, A Doll’s House, Macbeth and/or Hamlet*. The course will weave in a variety of supplementary texts that enhance student comprehension of core texts. The course will center on various types of writing including argument, analysis, and evaluation. The students will engage in the writing process through critical analysis of the text, drafting an argument, and working through the revision process. Other areas of study include vocabulary acquisition via the Sadlier Vocabulary Workshop program (Level G), mechanical expression, and literary analysis.
Advanced Placement English Literature and Composition

1.0 credit Language Arts Credit Grade: 12

Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

- Grade of 85% or higher in 139 or
- Grade of 90% or higher in 130 or
- Grade of 97% or higher in 131

The purpose of this course is to give qualified students the opportunity to read, write, think, and speak about challenging works of literature in a seminar setting. The overall reading goal is to provide for the experience, interpretation, and evaluation of literature through extensive writing and discussion. We will supplement our core readings with independent readings and supplementary texts. As we read, we will look to identify common themes among the novels, plays, poems, stories, articles, and essays. Our reading and writing will be supported by work from the Sadlier Vocabulary Workshop program (Level H). The way we make learning real and lasting is through finding connections between the different texts we immerse ourselves in during class. We will not study texts in isolation; rather, we will put them in conversation with one another and use them as lenses for critically viewing each text. We will learn to use literary criticism to create meaning with texts. We will learn to apply Theory of Mind to challenging texts, grapple with issues of authorial choice as a threshold concept, and practice a variety of writing approaches from analytical to argumentative. The way we use the texts of this course will help to prepare students for the AP Literature and Composition exam in May and a college level English course. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

In this AP course, students will be required to read and write more extensively and in more depth and can expect a greater demand for homework responsibilities and independent preparation.

AP Literature and Composition requires more of the following than in the Language Arts (IV) Honors level:

- Three summer reading books and four assessments
- Extensive fiction and non-fiction reading navigated using note-taking strategies
- Emphasis on university-level writing that recognizes writing as a process; developing a mature and sophisticated writing style
- Expectation of interdisciplinary learning experiences (challenging course work) to draw upon in seminar setting
- More homework responsibilities
- Love of reading and writing
- Willingness to speak and contribute during seminar setting

Language Arts Electives

*126 Creative Writing

0.5 credit Humanities, Technologies, & Arts Grades: 9/10 HAC access

In this course, students will explore the art of storytelling. The emphasis will be on creating short fiction and learning the techniques of short story writing. Students will participate in frequent short writing exercises in an attempt to learn about plot structure, conflict creation, dialogue, character development, and voice. Completion of written stories, novels, and writing contests will be required, as well as at least one submission by each student to the Literary Magazine. Computers will be used extensively, both for word processing and Internet exploration. Students who complete this course are not eligible to take 127 Writing Fiction.

*127 Writing Fiction

0.5 credit Humanities, Technologies, & Arts Grades: 11/12 HAC access

In this course, students will explore the art of storytelling. The emphasis will be on creating short fiction and learning the techniques of short story writing. Students will participate in frequent short writing exercises in an attempt to learn about plot structure, conflict creation, dialogue, character development, and voice. Completion of written stories, novels, and writing contests will be required, as well as at least one submission by each student to the Literary Magazine. Computers will be used extensively, both for word processing and Internet exploration. Students are not eligible to take this course if they have already taken 126 Creative Writing.
**128  Advanced Writing Fiction**
0.5 Credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12  HAC Access  
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:  
Grade of 94% or higher in 127  

For Advanced Writing Fiction, students will be expected to have the fundamentals of writing at their disposal. This environment will dive deeper into the elements of writing, emulating a college level writing environment. Students will be expected to work independently on writing projects, submit work for contests and publication, share their writing in a writing circle environment and produce a finished product, whether it be a novel, short story collection or poetry collection. Students will also be expected to complete an author study project and be able to identify elements in the works of a published author to implement into their own writing.

**150  Journalism/Newspaper Production**
1.0 credit  Humanities, Technologies, & Arts  Grades: 10, 11  HAC access  
Grade 12 students expressing an interest must have teacher recommendation from prior year’s LA teacher.  
This course will focus on all aspects of newspaper production. The class will study the specific steps of newspaper publication beginning with the generation of ideas for timely articles through the revision and publishing process. The students will study the ethics of student journalism, the interview process, feature and editorial writing, photography, editing, and layout. All students will have the opportunity and responsibility to develop articles and ideas for current issues of the SPRI HIAN. All writers for the SPRI HIAN, or those interested in becoming writers, should consider taking this course. Students electing Journalism/Newspaper Production will be responsible for the production of the school newspaper, THE SPRI HIAN. Technology will be used in the layout and production of the newspaper (digital cameras, desktop publishing, etc.)  

160  Journalism/Newspaper Production II  
1.0 Credit  Humanities, Technologies, & Arts  Grades: 11, 12  
Teacher recommendation only.  

**151  Literature and Film**
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12  HAC Access  

In teaching both literary and filmmaking techniques, this course will use a variety of carefully chosen films as a medium for understanding the relationship between film and literature. Students will study the language of film and will focus on artistic techniques, such as the use of lighting, camera angles, music and sound, and editing, in order to better evaluate a film’s success. Students will submit film reviews based on some of the techniques and devices studied and interpreted. All Language Arts academic standards will be met in this course with a heavy emphasis on persuasive writing.
# Social Studies

The Social Studies program at Springfield High School is designed to allow the student the option of becoming involved in specific aspects of the social sciences that parallel his/her specific interest. The program is designed to consider the development of the intellectual capabilities of each student which will in turn lead the student to become a more rational thinking being. Coupled with this is an emphasis on the application of the many higher order thinking processes including the various skills connected with decision making, problem solving, critical and creative thinking. The students will have the necessary knowledge, intellectual and social awareness, and communicative skills to function and develop in the 21\textsuperscript{st} century.

220  H United States History I: 1750 – 1877/ Honors

1.0 Credit  Social Studies  Grade: 9
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:

Grade of 94% or higher in Grade 8 Social Studies

This course surveys American History from pre-Revolution to the end of the 19th Century, highlighting some of the important political and cultural contributions by Pennsylvanians along the way. Important events, themes, and people are studied with an emphasis on their relationship to one another and their meaning to the present. The course examines the beneficiaries of the American Experience as well as those who were left out. It traces the extraordinary social, technological, economic and foreign policy transformations that have made us what we are as a people. Students are challenged to analyze events while using primary and secondary sources that sometimes lead to various interpretations of the evidence. Above all, students are required to think about the meaning of this nation’s history in their lives. Reading, writing, discussing, and role-playing are the essential strategies used in this course. The Internet also plays a vital role in accessing primary sources and varied interpretations. Students will be challenged to develop and hone skills specific to: researching, questioning, public speaking, cooperative learning, listening and analysis.

Within the Honors classes students will be expected to challenge themselves to think deeply about the connections between the historical texts they encounter and current events that are unfolding within the United States today. Students will also be expected to take engage in various independent and collaborative research and writing initiatives.

221  CP United States History I: 1750 – 1877/ College Preparatory

1.0 Credit  Social Studies  Grade: 9

240  H United States Civics and Government/ Honors – Grade 10

1.0 Credit  Social Studies  Grade: 10
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:

Grade of 84% or higher in Grade 9 United States History (I) Honors or
Grade of 94% or higher in Grade 9 United States History (I) CP

United States Civics and Government is designed to assist students in developing an understanding of the American political system and an appreciation for the important role that citizens play in our democratic republic. Units of study include the purpose and function of government, historical foundations and significant documents of American government, general processes of government, the interpretation and application of law, and the role of individual citizens and that of groups and organizations in our political system. Students will also compare and contrast the role of the federal government with that of the state of Pennsylvania. Internet research is used for simulations and problem solving projects as well as to provide a consistent awareness of current events in Washington and Harrisburg.

Within the Honors classes students will be expected to challenge themselves to think deeply about the connections between the historical texts they encounter and current events that are unfolding within the United States today. 1.0 Credit  
Social Studies  
Grade: 10  
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:  
Grade of 90% or higher in Grade 9 Honors United States History (I)  
Grade of 94% or higher in Grade 9 CP United States History (I)  

The Advanced Placement American Government and Politics course is an intensive program of instruction and personal study focusing on the national level of government and politics. Students will critically examine five common areas and subjects normally covered in an introductory college political science course: the Constitution; underpinnings of Government, political parties and interest groups; institutions and policy processes of the national government; civil rights and civil liberties. The course uses web resources extensively in addition to textbook and primary source materials. Students with consistently high grades in social studies and teacher recommendations will be considered for the course. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

222  **H United States History II: 1877 – Present /Honors**  
1.0 Credit  
Social Studies  
Grade: 11  
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:  
Grade of 84% or higher in Grade 10 Honors United States Civics & Government  
Grade of 94% or higher in Grade 10 CP United States Civics & Government with teacher recommendation.  

This course surveys American History from Industrialism to the present, highlighting some of the important political and cultural contributions by Pennsylvanians along the way. Important events, themes, and people are studied with an emphasis on their relationship to one another and their meaning to the present. The course examines the beneficiaries of the American Experience as well as those who were left out. It traces the extraordinary social, technological, economic and foreign policy transformations that have made us what we are as people. Students are challenged to analyze events while using primary and secondary sources that sometimes lead to various interpretations of the evidence. Above all, students are required to think about the meaning of this nation’s history in their lives. Reading, writing, discussing, and role-playing are the essential strategies used in this course. The Internet also plays a vital role in accessing primary sources and varied interpretations. A semester long research project will culminate with a formal research thesis paper.

*The Honors course is designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and materials in United States history. Students should learn to assess historical materials – their relevance to a given interpretive problem, their reliability, and their importance, and to weigh the evidence and interpretations presented in historical scholarship. A semester long research project will culminate with a formal 6-8 page research thesis paper.*

223  **CP United States History II: 1877 – Present /College Prep**  
1.0 Credit  
Social Studies  
Grade: 11

225  **Advanced Placement United States History**

1.0 Credit   Social Studies   Grade: 11

Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

- Grade of 90% or higher in Grade 10 Honors United States Civics & Government
- Grade of 94% or higher in 10th grade CP United States Civics and Government

The Advanced Placement program in United States History is designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and materials in United States history from early settlement to the present. This course prepares students for intermediate and advanced college courses by making demands upon them equivalent to those made by full-year introductory college courses. Student should learn to assess historical materials – their relevance to a given interpretive problem, their reliability, and their importance, and to weigh the evidence and interpretations presented in historical scholarship. The Internet also plays a vital role in accessing primary sources and varied interpretations for research projects. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

**Social Studies Electives**

*235  **Advanced Placement European History**

1.0 Credit   Social Studies   Grade: 12

Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

- Grade of 90% or higher in Grade 11 Honors United States Government and Politics, AP Government, or AP U.S. History
- Grade of 94% or higher in Grade 11 CP United States Government and Politics

This course is designed as a college level course and students are expected to take the AP test in May. The scope of the course is from the Renaissance to present day and utilizes a college level text plus a variety of primary sources. Students will be expected to complete several research projects plus participate in historic simulations and class discussions. Analysis of material to determine patterns in history is a necessity in the course, as, is understanding how to write a complete persuasive historic essay. Students must become comfortable in using the internet for research and contacting other AP sites. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

*252  **The African American Experience**

0.5 Credit   Humanities, Technologies, & Arts   Grades: 11, 12

This 0.5 credit elective course will examine issues, topics, and themes that are central to the African American experience. The course will depict the African background of the African American and the integral role they have played in the exploration and development of the United States. The following topics will be addressed: African American history from the African background and the slave trade to the present; U.S. slave communities; resistance and rebellion; abolitionism; the era of accommodation; and the origins and successes of 20th century protest and contemporary issues in the African American community.

*253  **Contemporary Issues in United States Government**

0.5 Credit   Humanities, Technologies, & Arts   Grade: 10, 11, 12

This course will deal with real world current issues that society is struggling to resolve. It will cut across many academic disciplines, and consider current and important problems we face today. Students will be graded on their conversations and debates involving politics, free speech, gender, race, crime, terrorism, privacy, etc. In addition, students will select other issues when they create multi-media presentations for their major project. Students will practice problem solving through research, deliberation and choice making.
The Civil and Criminal Law course offers the student an exciting hands-on experience in practical law using the Street Law Text and other Street Law materials. The major emphasis will be on practical application through student simulations, mock trials, moot court hearings and presentations. Students will be using the Internet to research past cases, precedents, and legal updates.

*255 Psychology
0.5 Credit
Humanities, Technologies, & Arts
Grades: 10, 11, 12
HAC access

The primary goal of this semester course is to expose students to some of the major topics and themes of the field of psychology. The course covers the history of psychology and four major perspectives of psychology: biological, behavioral, psychodynamic, and humanistic, as well as a study of the brain, social psychology and abnormal psychology. Students will gain insight into research in psychology by designing, conducting, and presenting experimental research. As a result of their experience in the course, students will gain a better understanding of the dynamics behind human behavior; their own and others.

*256 Advanced Placement Psychology
1.0 Credit
Humanities, Technologies, & Arts
Grades: 11, 12
HAC access
Prerequisite:
Grade of 90% or higher in honors level social studies courses
Grade of 84% or higher in AP level social studies courses

This is a rigorous college level course. By design, the course is patterned after a typical undergraduate introductory psychology course. A college-level text is used in the course. The course covers 14 designated topics: 1) History and Approaches; 2) Research Methods; 3) Biological Bases of Behavior; 4) Sensation and Perception; 5) States of Consciousness; 6) Learning; 7) Cognition; 8) Motivation and Emotion; 9) Developmental Psychology; 10) Personality; 11) Testing and Individual Differences; 12) Abnormal Psychology; 13) Treatment of Psychological Disorders; 14) Social Psychology. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

*257 From Gutenberg to Google: The Role of Technology in Society
0.5 Credit
Humanities, Technologies, & Arts
Grades: 9, 10, 11, 12
HAC access

Students in this course will examine the role that technology has played in influencing history and culture. Students will analyze the development of technologies in a historical context while reflecting on the role that various technologies currently play in the 21st century world. Specific attention will be given to the economic and social impact of specific technology usage and emerging technology trends. Participation will be a key component of the course and students entering this course should be prepared actively collaborate and to engage in active discussion of assignments.

*258 Know Your Rights: The Bill of Rights and You
0.5 Credit
Humanities, Technologies, & Arts
Grades: 11, 12
HAC access

Anyone who has ever watched a cop drama knows that criminal suspects have certain rights, including the right to remain silent and the right to an attorney. People speak their minds freely on television and on the internet knowing that they have a right to free speech. These rights, and many more, are guaranteed and protected under the United States Constitution and the Bill of Rights. In this course, we will explore these rights in real life cases and analyze the Supreme Court’s role as protector and defender of the Constitution. Activities will include debates and simulations, as well as participation in an intensive moot Supreme Court hearing.

*259 Economics Alive: The Power to Choose
0.5 Credit
Humanities, Technologies, & Arts
Grades: 11, 12
HAC access

Econ Alive! The Power to Choose demystifies economics for students. A concise, standards-based text and multiple intelligence activities help students grasp complex concepts in terms of understandable real-world situations. Students in this course will analyze news headlines to determine how events will cause demand or supply curves to shift, becomes members of the Federal Reserve and analyze economic data to set monetary policy, form businesses, create business plans, and compete for investor funding. Students will also become investors in a real-time stock market simulation.
**260 Comparative Cultures and Religions**

0.5 Credit  Humanities, Technologies, & Arts  Grades: 11, 12  HAC access

Students examine the cultural beliefs, practices, and religions of the peoples of Asia, Africa, and The Middle East with an emphasis on understanding and appreciating the diversity of our social world. Students will learn the cultural “Do’s and Don’ts” so necessary to conducting business in our increasingly interconnected world. We will also examine current areas of conflict through a cultural lens and work toward to developing a plan to foster a greater level of peace and tolerance in this troubled world.

**265 AP Human Geography**

1.0 Credit  Social Studies  Grades: 11, 12  HAC Access

The AP Human Geography course introduces students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth’s surface. Students learn to employ spatial concepts and landscape analysis to examine human socioeconomic organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and application.
## Science

The Science program at Springfield High School is designed to allow the student the option of becoming involved in specific aspects of the Sciences that parallel her/his specific interest. From Biology to Advanced Placement (AP) Environmental Science, the Science curriculum is flexible enough to account for individual needs. The program is designed to consider the development of the intellectual capabilities of each student which will in turn, lead the student to become an articulate and rational thinker. Coupled with this, is an emphasis on the application of higher order thinking processes including the skills connected with decision making, problem solving, and critical and creative thinking. The students will gain the necessary knowledge, intellectual and social awareness, and communicative skills to function and succeed in the 21st century.

Honors Biology is a rigorous and challenging course designed to explore the characteristics of the life. Course content includes the scientific method (summer work required), characteristics of living things, cell structure, function and transport, cellular reproduction, biochemistry, photosynthesis, cellular respiration, genetics, DNA, ecology and evolution. Students will be introduced to some of the techniques, equipment, and information used by biologists. In addition to in class lecture and lab activities, independent supplemental reading and enrichment activities will be assigned and completed outside of the classroom. Students will sit for their Keystone Biology Exam during this course.

Biology is a lab course designed to explore the characteristics of the life. Course content includes the scientific method, characteristics of living things, cell structure and function, cellular reproduction, biochemistry, photosynthesis, cellular respiration, genetics, DNA, and evolution. Students will be introduced to some of the techniques, equipment, and information used by biologists. Students will be doing many labs and activities to reinforce the concepts and develop their technical writing skills. Current biological issues will also be explored. The majority of 9th grade students will enroll in this course. Students will sit for their Keystone Biology Exam during this course.

This course is recommended for exceptional math and science students as evidenced by the prerequisites above. The major areas of study are atomic structure and mole concept, chemical bonding, kinetic molecular theory, solutions, chemical reactions, reaction rates, acid/base chemistry, and oxidation/reduction chemistry. Students will develop skills in making observations, analyzing data, drawing conclusions, and problem solving. Honors Chemistry students can expect:

- Additional assigned problems
- More in-depth treatment of concepts and problems
- More in-depth analysis of experimental techniques and results
- More frequent use of higher order thinking processes
- More challenging evaluations/assessments
- Opportunity for independent research through optional projects
321 CP Chemistry /College Prep
1.0 Credit
Prerequisite: Successful completion of CP Biology (311)

Chemistry is a laboratory course which emphasizes five major areas of study: atomic structure and mole concept, chemical bonding and chemical formulas, principles of chemical reactions, kinetic molecular theory, solutions and acid/base chemistry. Students will develop skills in making observations, analyzing data, drawing conclusions, and problem solving. The course involves use of calculators, simulations on the computer, and using the computer to produce lab reports. This course is recommended for college-bound students.

330 H Physics /Honors
1.0 Credit
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

Science
- Grade of 94% or higher in 320 or 321 (H or CP Chemistry)
- Grade of 84%-93% in 320 or 321 requires teacher recommendation
Math
- Grade of 94% or higher in 430 or 431 (H or CP Algebra II)
- Grade of 84%-93% in in 430 or 431 requires teacher recommendation

This course focuses on understanding the basics laws of mechanics: motion, forces, momentum, energy, torque, rotation, and electricity. Skills of algebra, geometry, and trigonometry will be integrated freely and extensively in the course, both in the formulation of physical laws and in the solutions of problems. Students are expected to manipulate algebraic expressions involving multiple variables and should have an understanding of basic trigonometric functions. The student will be required to conduct experiments and compile data into lab reports. In addition, students in the honors physics course will be expected to:

- Compile 12-15 formal lab reports throughout the course,
- Conduct independent and group research, and
- Write a research paper on important physics concepts.

This course is intended for college-bound students who have a career interest in the sciences, math, or engineering.

331 CP Physics /College Prep
1.0 Credit
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

Science
- Successful completion of 320 or 321 (H or CP Chemistry)
Math
- Successful completion of 430 or 431 (H or CP Algebra II)

This course will focus on the laws of mechanics, including motion, forces, momentum, energy, torque, rotation and electricity. Students taking the course will improve their problem-solving skills and learn to compile laboratory data into a lab report. Throughout the course, students will use lab equipment and computer-interface software to collect data and will be required to report their findings through formal lab reports. Students are expected to use mathematics to quantitatively discuss the concepts of physics, as well as be able to solve problems. This course is intended for college-bound students who are not necessarily interested in math, the sciences, or engineering as possible careers.
Advanced Placement Science Classes

*350  Advanced Placement Biology
1.5 Credits  Humanities and Elective Credit  Grades: 11, 12  HAC Access
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
- Grade of 87% or higher in 305/306 (H Academy Biology/Chemistry) and 320
- Grade of 94% or higher in 311 or 321 (CP Biology/Chemistry)
- Grade of 84% to 93% in 311 or 321 requires teacher recommendations

This course is designed to be the equivalent of a first year college course in Biology, and has been developed according to the new guidelines of the College Board. In-depth topics of study include molecular genetics and evolution, cell structure and energy transformation, population ecology, plants, and animals. The required lab component of the course includes investigations and technologies in areas such as recombinant DNA technology, aquatic productivity, botany and biochemistry, and comparative vertebrate dissections, will help students improve written and oral communication skills. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP GPA weight.

*351  Advanced Placement Chemistry
1.5 Credits  Humanities and Elective Credit  Grades: 10, 11, 12  HAC Access
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
- Science: Grade of 94% or higher in 311, 320 or 321 (Biology, H or CP Chemistry)
- Math: Grade of 84 to 93% in 311, 321, or 320 requires teacher recommendation
- Math: Grade of 70% or higher in 430 or 431 (H or CP Algebra II) – strongly recommended

This course is designed to be the equivalent of a first year college course. In AP Chemistry students will master fundamental principles of chemistry and develop competence in problem solving. The areas of study include a highly rigorous treatment of the structure of matter, the status of matter, chemical reactions, and descriptive chemistry. There is also a strong laboratory component for the course. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

355  Advanced Placement Physics 1
1.0 Credit  Humanities and Elective Credit  Grades: 10, 11, 12
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
- Science: Grade of 94% or higher in 320 or 321 (H or CP Chemistry)
- Math: Grade of 84%-93% in 320/321 requires teacher recommendation
- Math: Grade of 94% or higher in 430 or 431 (H or CP Algebra II)
- Grade of 84%-93% in in 430 or 431 requires teacher recommendation

Students who have already completed Honors Physics 330 are not eligible for 354. This course is intended for college-bound students who have a career interest in the sciences, math, or engineering. No prior physics education is required; however this is a rigorous AP course for students who intend to pursue further honors and AP science electives. This course focuses on understanding the basics laws of mechanics and electricity: motion, forces, momentum, energy, torque, rotation. Skills of algebra, geometry, and trigonometry will be integrated freely and extensively in the course, both in the formulation of physical laws and in the solutions of problems. Students are expected to manipulate algebraic expressions involving multiple variables and should have an understanding of basic trigonometric functions. The student will be required to conduct experiments and compile data into lab reports. This course follows the AP curriculum and will prepare students for the AP Physics 1 exam. Students must take the Advanced Placement Exam in order to earn the AP GPA weight.
*356 Advanced Placement Physics 2
1.0 Credit  Humanities and Elective Credit  Grades: 11, 12  HAC Access
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

Science
Grade of 94% or higher in 330 or 354
Grade of 84-93% in 330 or 354 with teacher recommendation

Math
Grade of 84% or higher in 442 and/or 443
Recommend completion of 442
Recommend completion of or concurrent enrollment of 443

This is an AP physics course serving as an algebra-based survey of classical mechanics, electricity & magnetism, thermodynamics, fluids, waves, optics, & nuclear physics. Skills of algebra, geometry, and trigonometry will be integrated freely and extensively in the course, both in the formulation of physical laws and in the solutions of problems. Students are expected to manipulate algebraic expressions involving multiple variables and should have an understanding of basic trigonometric functions. The student will be required to conduct experiments and compile data into lab reports. This course follows the AP curriculum and will prepare students for the AP Physics 2 exam. Students must take the Advanced Placement Exam in order to earn the AP GPA weight.

*352 Advanced Placement Physics C: Mechanics
1.0 Credit  Humanities and Elective Credit  Grades: 11, 12  HAC Access
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

Grade of 94% or higher in 330
Grade of 84%-93% in 330 or 331 w/ teacher recommendation
Grade of 84% or higher in 355; 84% or lower requires teacher recommendation
Concurrently taking or successful completion of 460 or 461 (AP Calc AB or BC)

An advanced mechanics course offered to students who already completed a semester of physics (honors preferred). Taking AP Calculus concurrently, or in the past is also recommended. The course will take a calculus-based approach to exploring the topics covered in introductory physics including: kinematics, dynamics, work & energy, momentum, rotation, gravitation, and oscillations. Students must take the Advanced Placement Exam in order to earn the AP GPA weight.

*362 Advanced Placement Environmental Science
1.0 Credit  Humanities and Elective Credit  Grades: 11, 12  HAC Access
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:

Grade of 94% or higher in 305, 311, 320 or 321
Grade of 84-93% in 305, 306, 311, 320 or 321 requires teacher recommendation

This course will provide scientific principles, concepts, and methodologies required to understand the interrelationship of the natural world, to identify and analyze environmental problems, to evaluate risks associated with these problems and to examine alternative solutions. This class includes a strong lab component. Topics include energy flow, the biosphere, the human population, renewable and nonrenewable resources, environmental quality, and global change. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP GPA weight.

Science Electives

*325 General Organic & Biochemistry
0.5 Credit  Humanities and Elective Credit  Grades: 11, 12  HAC Access
Prerequisite: Successful completion of Biology (305 or 311) and Chemistry (310, 320 or 321)

General Organic & Biochemistry (GOB) is a laboratory course designed to introduce the basics of organic chemistry and then cover key concepts from biology from a chemistry standpoint. The basic concepts of organic chemistry including nomenclature and structural aspects of the major functional groups and their reactions will be covered first. The second half of the course will cover biomolecules, a chemical perspective of the cell and key biochemical reactions. While there may be some overlap, students having taken AP Biology or AP Chemistry will still find new material in this course. This course is recommended for students planning on
health-related careers (nursing, dental hygienist, physical therapy) that may require a biochemistry course or college-bound students who are anticipating taking organic chemistry or biochemistry.

*361 Planet Earth
0.5 Credit  Humanity and Elective Credit  Grades: 9, 10, 11, 12  HAC Access

Planet Earth is an introductory course designed to cover the following topics about our planet: the atmosphere, the oceans, its ecosystems, human population dynamics, its agriculture, water resources, biodiversity decline, energy challenges, atmospheric pollution, and climate change. This course along with biology and chemistry will prepare the student for AP Environmental Science in grades 11 or 12.

*365 Comparative Vertebrate Anatomy & Physiology
0.5 Credit  Humanities and Elective Credit  Grades: 10, 11, 12  HAC Access
Course Fee: $35  Prerequisites: Successful completion of Biology

This course provides an introductory study of vertebrate organisms with a mandatory dissection lab component. This course is designed to introduce students to modern classification systems as well as to terminology of anatomy and physiology. The content will offer a survey of the major vertebrate classes with an emphasis on evolutionary adaptations of each group. Cooperative lab dissection work and small projects are a required component of this course.

366 Human Anatomy and Physiology
0.5 Credit  Science Elective Credit  Grades: 11, 12  HAC Access
Prerequisites: Grade of 74% or higher in 305/306, 311 320, 321

This course is a study of both human anatomy and physiology with an integral laboratory component. This course is designed to prepare students who are considering entering the medical, nursing, or allied health fields and as such is of a rigorous content level. The course will offer a survey of important anatomical terms as well as an overview of the body’s major organ systems. Students will have the opportunity to gain insight into various career options and the studies required for them.

*373A Meteorology
1.0 Credit  Humanities and Elective Credit  Grades: 10, 11, 12  HAC Access
Prerequisites: A strong algebra background is necessary. A strong chemistry background if preferred.

This course is a study of the earth’s atmosphere and weather-related phenomena. Major principles of meteorology will be addressed by long-term study of real time data sources from the Internet. The students will study the structure of the atmosphere, basic meteorological principles, weather maps and severe weather systems. This is a highly challenging, science course on par with introductory Meteorology courses taught at the college level. The curriculum presupposes students have an understanding of the gas laws, fundamental physics principles and excellent math skills.

*374 Astronomy
0.5 Credit  Humanities and Elective Credit  Grades: 10, 11, 12  HAC Access
Prerequisites: A strong algebra background is necessary; a strong chemistry background is preferred.

This course is a rigorous introduction to the field of astronomy designed to provide an overview of astronomy, including basic physical concepts involving planets, stars, galaxies, and cosmological distances. The course is designed to emphasize conceptual understanding and an appreciation for the discovery process. Besides classroom work, students will complete an observational component as well as a research paper.

Topics may include, but are not limited to: astronomical techniques of measurement and calculations, the visible sky, constellations, the sun, the planets & their moons, cosmological models, Kepler and Newton’s laws of motion, the electromagnetic spectrum, properties of stars, stellar distances, and stellar evolution.
*379 Forensic Science

0.5 Credit  Humanities and Elective Credit  Grades: 10, 11, 12  HAC Access

Prerequisites:  Grade of 80% or higher in 305 or 311

This course will cover updated techniques, practices and procedures used in forensic science. Students will participate in forensic analysis and the proper procedures for collection and preservation of evidence at crime scenes. Students will investigate new technologies used by forensic scientists. Discussions of probabilities role in interpreting the significance of scientifically evaluated evidence will be incorporated in this course. Students will study actual cases to see the role of forensic science in criminal investigations.
Mathematics

The Springfield High School Mathematics department offers programs that will provide students with mathematics courses appropriate to their future goals. From Algebra I to Advanced Placement (AP) Calculus, the mathematics curriculum has offerings to meet each student’s specific needs. All courses are designed to prepare students to use mathematics effectively in today’s world. The critical skills of problem-solving, logical reasoning and decision-making are incorporated and developed in all courses. Recognizing the importance of technology in today’s world, the department emphasizes the use of technology in all courses in order to enable students to develop superior skills in this area. A Texas Instrument TI 84 or TI 84+ graphing calculator is a necessity for Algebra II courses and above. Students should consult the academic planning and programming guide for proper course sequence and prerequisites.

411  CP Algebra I /College Preparatory
1.0 Credit  Mathematics Credit
Prerequisite: Successful completion of Math at ETR
Students not completing Math at ETR to a satisfactory level may be required
to take a math support class in conjunction with Algebra II.

The goal of this course is to develop algebraic skills and concepts and to enhance problem solving ability that every student needs to succeed in college, technical school, or the working world. A secure foundation in basic mathematical skills, fractions, and decimals is essential for success. Topics covered in this course include: number theory, polynomial expressions and equations, products and factors of polynomials, coordinate graphing, graphing linear equations, determining and analyzing the slope of lines, probability, and radical and rational expressions. Algebra skills and concepts needed to solve equations, inequalities and systems of equations will be developed. Algebraic problem solving techniques will be employed to solve relevant applications. Graphing calculator technology will be introduced. All topics in this course will prepare students for successful completion of the Algebra I Keystone exam. A TI Graphing Calculator is recommended.

430  H Algebra II /Honors
1.0 Credit  Mathematics Credit
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:
Students coming from ETR: 84% in Geometry or 94% in Algebra I
Students at SHS: 94% or higher in Algebra I

This course is recommended for those exceptional mathematics students who have successfully completed Algebra I with distinction. Students will experience a challenging investigation of many topics including transformations of functions, modeling with linear, quadratic, polynomial, exponential, and logarithmic functions, solving linear and non-linear systems, operations with polynomial functions, exploring radical functions, working with sequences and series, and investigating probability including permutations and combinations. The Honors course will also include study of trigonometric ratios and functions. Graphing calculator technology will accompany students throughout the course. Graphing calculator technology is a course requirement. Refer to the course syllabus for recommended brands/models. Topics will be covered in more depth than in the CP level course, 431.

431  CP Algebra II /College Preparatory
1.0 Credit  Mathematics Credit
Prerequisite: Successful completion of High School level Algebra I
Students not completing Algebra I to a satisfactory level may be required
to take a math support class in conjunction with Algebra II.

Algebra II is a demanding course designed to challenge the student through a more thorough investigation of many topics, including transformations of functions, modeling with linear, quadratic, polynomial, exponential, and logarithmic functions, solving linear and non-linear systems, operations with polynomial functions, exploring radical functions, working with sequences and series, and investigating probability including permutations and combinations. Graphing calculator technology will accompany students throughout the course. Graphing calculator technology is a course requirement.
420  H Geometry/Honors
1.0 Credit  Mathematics credit
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
Grade of 94% or higher in 431 or a grade of 84% or higher in 430

This course is recommended for those students who have completed Honors Algebra II or who have completed Algebra II in high school and are looking for a rigorous course. Students are expected to have a solid understanding of mathematical processes. This course will help students develop the foundations of deductive reasoning which will enable them to draw upon their ability to reason in a logical framework to construct proofs. Through the use of applications and investigations, students will learn the properties of polygons, circles, perpendicular and parallel lines, along with perimeters, areas, and volumes, as well as transformations, congruence, and similarity. The use of transformations will be critical to the understanding of these concepts. Due to the nature of this course, in-depth discussion and extension of certain topics and additional projects and/or assignments will be evident throughout the course. Projects involving:
- Convex and non-convex figures
- Abstract applications of reflections, regular polygons, reflection/rotation symmetry
- Substantially more involved proofs
- Indirect proofs, indirect reasoning
- Introduction of the calculus concept of limit as related to area
- Abstract computation of formulas involving solids
- Derivation of certain formulas

421  CP Geometry/ College Preparatory
1.0 Credit  Mathematics credit
Prerequisite:  Successful completion of 430 or 431

This course is recommended for those students who have completed Algebra II. Students are expected to have a solid understanding of mathematical processes. This course will help students develop the foundations of deductive reasoning which will enable them to draw upon their ability to reason in a logical framework to construct proofs. Through the use of applications and investigations, students will learn the properties of polygons, circles, perpendicular and parallel lines, along with perimeters, areas, and volumes, as well as transformations, congruence, and similarity. The use of transformations will be critical to the understanding of these concepts.

439  Algebra III/ Trigonometry
1.0 Credit  Mathematics credit  Grade 12
Prerequisite:  Teacher recommendation along with recommended standards of academic performance as follows:
Successful completion of 430 or 431
Successful completion of 420 or 421

This course is recommended for the college preparatory senior who may need reinforcement of Geometry and Algebra II eligible content. Students will have technological experiences with statistical displays of data, linear and quadratic models. Other topics include: transformations of parent functions, trigonometric ratios and laws.

442  H Discrete Mathematics /Honors
1.0 Credit  Mathematics Credit  Grades:  11, 12
Prerequisite:  Teacher recommendation and completion of Pre-Calculus or Honors Pre-Calculus.

This course is recommended for those students who have completed Pre-Calc or Honors Pre-Calc and need additional experience before taking calculus at SHS or Post-Secondary. In this course students will continue their daily experience with graphing calculator technology. Topics to be covered will include: double angle formulas, $\alpha + \beta$ formulas, trigonometric identities, polar coordinates, complex numbers in trigonometric form, introduction to mathematical logic and reasoning, analyzing functions, solving advanced algebraic equations and inequalities, applications of algebraic functions, mathematical induction and its application to factoring.
inequalities, transformations of ellipses and hyperbolas, additional proofs of trigonometric identities, and if time allows, derivatives will be introduced.

Due to the honors level, in-depth discussion and extension of certain topics will be evident throughout the course.

458 H Pre-Calculus/ Honors

1.0 Credit Mathematics Credit
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:
Grade of 84% or higher in Honors Algebra II
Grade of 94% or higher in CP Algebra II

This course is recommended for those exceptional mathematics students who have completed Honors Algebra II and Honors Geometry. In this course students will have daily experience with graphing calculator technology in the investigation of such topics as functions and models, trigonometric functions and their inverses, trigonometric identities, explicit and recursive formulas of sequences, Pascal’s Triangle and the Binomial Theorem, ellipses and hyperbolas, and the logic of solving inequalities.

Due to the nature of this Honors course, in-depth discussions, proofs, and extension of certain topics and additional projects and/or assignments will be evident throughout the course. Upon successful completion of this course, students will be prepared to take AP Calculus.

459 CP Pre-Calculus/College Prep

1.0 Credit Mathematics Credit Grades: 10, 11, 12
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:
Grade of 74% or higher in CP Algebra II

This course is recommended for those math students who have completed CP Algebra II and CP Geometry. In this course students will have daily experience with graphing calculator technology in the investigation of such topics as functions and models, trigonometric functions and their inverses, trigonometric identities, explicit and recursive formulas for sequences, Pascal’s Triangle and the Binomial Theorem, and the logic of solving inequalities.

460 Advanced Placement Calculus AB

1.0 Credit Mathematics Credit Grades: 11, 12
Prerequisite: Teacher recommendation along with recommended standards of academic performance as follows:
Grade of 84% or higher in 442 of 458

Integrals and the Fundamental Theorem of Calculus

- Anti-differentiation is the inverse process of differentiation.
- The definite integral of a function over an interval is the limit of a Riemann sum over that interval and can be calculated using a variety of strategies.
- The Fundamental Theorem of Calculus, which has two distinct formulations, connects differentiation and integration.
- The definite integral of a function over an interval is a mathematical tool with many interpretations and applications involving accumulation.
- Anti-differentiation is an underlying concept involved in solving separable differential equations. Solving separable differential involves determining a function or relation given its rate of change.

Students must take the AP Exam in order to earn the AP grade weight. Students engaged in the college admission process should understand that prospective colleges want to see high school students enrolled in AP mathematics courses as evidence that the student is taking a challenging, rigorous course load.

### Fundamental Theorem of Calculus

The definite integral of a function over an interval is the limit of a Riemann sum over that interval and can be calculated using a variety of strategies.

The Fundamental Theorem of Calculus, which has two distinct formulations, connects differentiation and integration.

The definite integral of a function over an interval is a mathematical tool with many interpretations and applications involving accumulation.

Anti-differentiation is an underlying concept involved in solving separable differential equations. Solving separable differential involves determining a function or relation given its rate of change.

### Big Idea 4

Enduring understanding

### Series

The sum of an infinite number of real numbers may converge.

A function can be represented by an associated power series over the interval of convergence for the power series.

---

Students must take the AP Exam in order to earn the AP grade weight. Students engaged in the college admission process should understand that prospective colleges want to see high school students enrolled in AP mathematics courses as evidence that the student is taking a challenging, rigorous course load.

This course is designed to meet the mathematical and research needs of students who plan to enter such fields as economics, business, education, psychology, sociology, biology and medicine, as well as science and mathematics. This course is considered excellent preparation for usual college courses offered in these fields. This course requires a good deal of independent work outside of the classroom. The topics covered in the course include measurement scales and sample design, measures of center and dispersion, probability, estimation of confidence intervals, normal and binomial distributions, sampling distributions, hypothesis testing, linear regression, and chi-square tests of independence and goodness of fit.

#### *446 Mathematics for Business and Finance*

Topics will include: Managing Money (Gross and net income), Investments (simple interest, compound interest, annuities), Purchases (sales tax, unit price, sale price), Loans (single payment, installment, APR) Mortgages (loans, total interest and cost, closing costs, real estate taxes and insurance), Insurance (homeowners, health, life), Investments (CDs, stocks, dividends, bonds, mutual funds, retirement). Students, particularly in the vo-tech fields, need concrete financial skills and knowledge. None of our current mathematics courses address these topics. This course would be ideal for seniors as an alternative to Pre-Calculus or Algebra III/Trig.

#### *450 Advanced Placement Statistics*

<table>
<thead>
<tr>

</tbody>
</table>

This is a rigorous, time-consuming, advanced placement course, which introduces the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The topics for AP Statistics are divided into four major themes: exploratory analysis,
planning a study, probability, and statistical inference. This course follows the AP curriculum. Students must take the Advanced Placement Exam in order to earn the AP grade weight. Students engaged in the college admission process should understand that prospective colleges want to see high school students enrolled in AP mathematics courses as evidence that the student is taking a challenging, rigorous course load.
### World Language

The need for all learners to become competent in their ability to communicate with people of other countries is increasingly apparent due to instantaneous worldwide communication networks and an economy that is globally interconnected. Proficiency in languages other than one's own is a definite asset to the workplace, and for personal enrichment, especially when traveling. The World Language Department offers courses in French, Spanish, and German. Students may elect to take Spanish through the Advanced Placement level; German is offered through level 4 and French is offered through level three. With each additional year of study, students improve their linguistic fluency and grammatical accuracy, and continue to gain insight into the culture and literature of the language they are studying. Because learning a language involves continually building upon previous knowledge, the World Language faculty strongly recommends that students earn a minimum grade of 70% in a prerequisite course in order to progress to the next level.

The purpose of this course is to introduce and develop the skills necessary to listen, speak, read, and write French at an elementary level, with the emphasis on developing conversational skills. Students will learn vocabulary and basic structures, which will become the means to understand and be understood in the language. Students will gain knowledge of and sensitivity towards the culture and customs of the French-speaking world. A video series, audio recordings, and on-line resources are integral parts of the course.

In this course students will continue to develop their basic listening, reading, speaking, and writing skills. There will be an emphasis on developing students’ understanding and appreciation of French-speaking cultures, and on developing their conversational skills. A video series, audio recordings, and on-line resources are integral parts of the course.

This course will continue to strengthen the skills of listening, speaking, reading, and writing at an intermediate level. Cultural readings, situational vocabulary, and more advanced structures will be the primary focus of the course. Much of the learning and practice of this material will be done in co-operative groups, through small group discussion, presentations, and compositions. A variety of teaching techniques and materials will be used, including a video series, and audio recordings.

The purpose of this course is to begin to develop fundamental speaking, listening comprehension, reading, and writing skills. Students will gain a knowledge of and sensitivity towards the culture of the Spanish-speaking peoples of the world. Activities in this course will help the student master basic vocabulary, use questions and answers, develop listening comprehension skills, read elementary selections, and study the customs of Spanish-speaking countries. Audio selections, videos, and on-line resources will aid in furthering competency. Spanish I is intended for students who have never taken Spanish or for those who have had a minimal exposure. Students successfully completing the ETR Spanish I program should enroll in Spanish II.

This course is intended for students who have successfully completed Spanish I. In order to continue the development of basic speaking, listening, reading, and writing skills, students will learn to use the vocabulary appropriate to their level in meaningful
spoken and written sentences and brief conversations. Through the reading of a short novel and cultural readings from the textbook, discussions, and projects, students will be better able to understand some of the cultural aspects of the various Spanish-speaking peoples. On-line resources, videos, and an audio program are integral parts of this course.

523 **Spanish III /College Prep**
1.0 Credit  
Prerequisite: Successful completion of 522  
World Language  
Grades: 10, 11, 12  
The purpose of this course is to enable Spanish students to increase proficiency in conversation and writing. A continued development of fundamental vocabulary, listening comprehension, reading, and writing skills will be stressed. Students will read short stories and cultural selections in Spanish. Special projects will be assigned to promote speaking and writing proficiency. On-line resources and an audio program are integral parts of the course.

524 **Conversational Spanish**
0.5 Credit  
Prerequisite: Completion of 523. Grade of 80% or better is recommended  
World Language  
Grades: 11, 12  
Students may enter Conversation following Spanish III. Students will speak based on a text, movies, and a short novel. Students participate in role play, dramas and skits. Students should be prepared to work closely with others and to participate in presentations. Conversation is a good way to increase fluency and keep in touch with Spanish for college courses or everyday use.

525 **H Spanish IV /Honors**
1.0 Credit  
Prerequisite: Completion of 523 and a grade of 84% or better are recommended  
World Language  
Grades: 11, 12  
In this course students will work on continuing to develop advanced listening, reading, speaking, and writing skills, with an emphasis on both oral and written communication skills. Gaining fluency in the language through the use of cultural readings, situational vocabulary, and more advanced structures will continue to be the primary focus of the course. Students will create multi-media projects and write extensively. A variety of teaching techniques and materials will be used, on-line resources, audio recordings, and video resources will aid in furthering competency in listening comprehension, speaking and cultural awareness.

526 **Advanced Placement Spanish Language**
1.0 Credit  
Prerequisite: Grade of 84% or higher in 525  
World Language  
Grades: 11, 12  
The Advanced Placement Spanish course is an intensive course of instruction that follows the AP Spanish Language curriculum and continues to develop all four communication skills. Through the use of vocabulary enrichment, varied reading materials, and discussion on a variety of topics, students will be able to communicate more effectively in written and spoken Spanish. Audio and video tapes, as well as on-line resources will aid in furthering competency in listening comprehension, speaking, and cultural awareness. Students must take the Advanced Placement Exam in order to earn the AP grade weight.

531 **German I /College Prep**
1.0 Credit  
World Language  
Grades: 9, 10, 11, 12  
Students will develop basic communicative proficiency through a variety of oral and written activities: stories, dialogues, teacher-student interaction, small group activities, readings, songs and games, as well as through use of a strongly integrated audio, video and software program. Students will be introduced to the customs and culture of the German speaking people, learning about a typical student’s family and school life, sports and other past-time activities, shopping, and eating out.

532 **German II /College Prep**
1.0 Credit  
Prerequisite: Successful completion of 531  
World Language  
Grades: 10, 11, 12
Students will continue to develop their communicative proficiency through storytelling, role-playing, readings, and interacting with the teacher and their classmates, as well as through use of a strongly integrated audio, video, and software program. Grammar and vocabulary will be expanded as students cover topics such as giving directions, shopping for gifts, talking about past vacations, and food and physical activities as they relate to health. Students will exchange letters with e-pals in German speaking countries in order to more personally expand their understanding of the culture. **Student Travel Abroad Opportunity to Germany.** There is travel available to Germany. Teacher in the department will have the pertinent information about the program.

533  **German III/College Prep**

*It is strongly recommended that German II was completed with a minimum grade of 84% to be successful in this course.*

Students will continue to develop their communicative proficiency through storytelling, role-playing, and interacting with the teacher and their classmates, as well as through use of a strongly integrated audio, video, and software program. Particular emphasis will be placed on practicing real-life situations one might encounter on a trip to a German speaking nation. Students will read traditional folk and fairy tales, as well as more contemporary stories. An additional video series will help students hone their listening and speaking skills, and gain an ever-growing awareness of the culture and customs of the people. **Student Travel Abroad Opportunity to Germany.** There is travel available to Germany. Teacher in the department will have the pertinent information about the program.

561  **Latin I**

<table>
<thead>
<tr>
<th>1.0 Credit</th>

</table>

This course is intended to introduce the students to the structure and syntax of the Latin language, and to examine the parallels between Latin and English syntax, structure, and vocabulary. This course will enable students to translate and compose introductory Latin. Students will be guided through the reading of elementary passages, as well as in the preparation of projects. Latin is the foundational language of the sciences, medicine and law; students pursuing these fields after high school should consider Latin a prerequisite. This course will also benefit students taking the SAT and ACT.
## Administrative Technologies

The Administrative Technologies Department at Springfield High School is designed to provide students the option of becoming involved in specific aspects of the business and technology world that parallels their personal and career interests. Students have the opportunity to develop the knowledge and skills needed to succeed in business and to function more efficiently in the technologically driven 21st Century. The program develops lifelong learning skills that foster flexible career paths and confidence in adapting to a workplace that demands constant retooling.

This course assumes no previous experience in web design. Students learn to identify the components and characteristics of high quality sites and how to create them. The class covers file structure and organization, basic graphic editing as well as color and design strategies. We also explore some creative and fun features including Flash animation, sound and interaction. The class culminates with the creation of an all-inclusive web site displaying all their work in this class.

Prerequisite: Successful completion of 630

Web Design II takes students to the next level in web design. Students have the opportunity to explore their different areas of interest and develop skills in those areas. While the first few classes are review and refresher exercises, we then move onto lessons on problem solving, team building and design. Later lessons are specific to the group's interests. Some topics you might want to explore include: editing HTML5 code, Dreamweaver, CSS, Flash websites, Flash animation, Flash Games and debugging JavaScripts.

This course will provide hands-on experience in publication and communication: Students learn to make professional looking documents such as brochures, stationery, business cards, flyers, programs, newsletters, children stories, etc. using Microsoft Publisher. Each student will develop a portfolio of work to document creativity as text and graphics are brought together to create effective design. Principles of layout and design, graphic design techniques, and publishing terminology are stressed. Opportunities for creativity, problem solving and decision making are provided in a fun and relaxed classroom environment where students know what they have to do, when it is due and are given the time to do their best work.

This course is designed to introduce students to the fundamentals of Adobe Photoshop. Students will explore the questions that face today's Photoshop artist and provide some educated answers through the use of Adobe Photoshop’s digital tools and features. Students will learn basic graphic design principles while creating, editing, and manipulating images. Students will use basic and advanced editing tools of Photoshop to create logos, movie posters, magazine covers, and digital collages.

Prerequisite: Successful completion of 645

This course merges and expands on prior knowledge and skills learned in Photoshop I. The course requires students to research and analyze all components of the design process and sets the stage for independent design projects. This course teaches students more advanced digital techniques using Photoshop CSS including but not limited to: image manipulation through masking and layers, multiple selection methods, saving and exporting, scanning, retouching, pen tool, and cutting edge techniques used in industry today.
904A  Computer Applications
0.5 credit  Human, Technologies, & Arts  Grades: 9, 10, 11, 12

‘Computer Applications’ is designed to develop microcomputer skills with a primary emphasis on the Microsoft Office application suite with the extension to collaborative, cloud computing resources. Software programs include word processing, database development, spreadsheets, and presentation creation. This course is an introductory, software application class that is self-directed. Resources allow students the opportunity to complete at a basic, intermediate or advanced level and include study materials for Microsoft Office Certification. Google Apps for education will be incorporated into the course. The introduction will include the suite of tools including Docs, Sheets, Slides and Sites. The emphasis of this introduction will focus on the collaborative advantages of these using the tools in group projects and ubiquitous Internet-based editing.

945  Introduction to Programming
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12

This course allows students to explore the field of computer programming. Students learn basic programming functions as they develop problem solving strategies and critical thinking skills. Students will create design, write, and develop console and Graphical User Interface (GUI) applications. Topics focus on the object-oriented paradigm, control and decision structures, loops, parameters, modular programming, the software development process, documentation, debugging, validation and testing.

946  There’s An App for That: Mobile App Development
0.5 credit  Human, Technologies, & Arts  Grades: 11, 12

‘There’s An App for That’ is a course where creativity, problem solving, and technology skills converge to design mobile apps for smart phones. Areas of interdisciplinary study will include computer programming, database management, web design, video production, marketing, and graphics (Adobe Photoshop & Illustrator). Course emphasis is placed on collaborative team work throughout the process of idea generation, design document creation, prototyping, technical development, and testing of mobile applications. The capstone of the course is focused on research and development of a mobile application that has the potential to make the SHS experience better for students, parents, or staff. (* It is suggested that students have an android device for this course, but emulators are available)

951  Emerging Technologies/Tech Support
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12
Prerequisite:  Teacher Recommendation

This class is for those individuals who have a serious interest in computers and technology and are considering a career in IT. This class will focus on troubleshooting hardware/software issues throughout the building while working in conjunction with the High School and District Tech Departments. When students are not troubleshooting or assisting others in the building, they will work independently in a structured environment to develop digital literacy skills by learning about the latest topics in technology.

955A  Introduction to Business
0.5 credit  Humanities, Technologies, & Arts  Grade: 10, 11, 12

This course introduces students to the world of business: how they are planned, organized, created, and make or lose money in our economic system. Students learn about the different fields of study within business and the career opportunities that exist in each field. In addition to the textbook, students discuss real business issues and current events directly related to business the economy and consumers.

965  Business II
0.5 credit  Humanities, Technologies, & Arts  Grade: 10, 11, 12

This course continues our exploration of business; different fields of study within business and careers possible for young people with an understanding of business. In addition to the textbook, students discuss real business issues and current events directly related to business the economy and consumers. To add a little more fun to the class, students buy and sell stocks in the online Simulated Stock Market game where the winners walk away with small prizes and big bragging rights.
956  Marketing
1.0 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12

This course presents marketing as a set of skills and knowledge combined with economics, finance, and career planning to create strategic plans. Students learn the foundations and functions needed to successfully market goods, services, and ideas to consumers. Professional development, customer service, and technology are presented as keys to students' success. While students study business, economics, selling, human relations, communications, distribution, promotion, product planning, and pricing, they also see marketing as a career choice. Marketing is recommended for students considering a university major in Business Administration, Marketing and Communications.

958A  Money Management
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12

In this course, students will discover how career choices affect future income. They will learn how taxes and wages can affect their lives. The students will build a resume in order to properly market themselves. They will explore the banking and credit system, including checking accounts and maintaining proper financial records. The students will understand how to properly manage their money by creating buying plans, setting limits and maintain a personal budget. The students will understand the costs, pitfalls and benefits of credit. Upon completion of this course the students will be able to use the tools necessary to live a financially responsible life. This course fulfills the Personal Finance & Money Management credit requirement.

963  Accounting I
1.0 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12

Students will learn to maintain financial records using basic accounting procedures. Included is instruction in the full accounting cycle of a sole proprietorship, as well as a corporation, with the significance of accounting on management decisions. Students will explore accounting as a career and adapt accounting procedures to personal finances. Accounting is recommended for those who are considering a university major in business or accounting. This course fulfills the Personal Finance & Money Management credit requirement.

964  Accounting II
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of 963

This course offers proficiency in basic and complex accounting procedures for corporations. Principles of a merchandising business and corporation structures will be approached realistically. This course is designed for students who hope to own a business or follow a career in accounting.

Advanced Placement Courses

980  Advanced Placement Computer Science (A)
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of 945 and either has completed or be currently enrolled in Algebra II

This advanced placement course is offered to those students with excellent problem solving ability and a keen interest in computer science as a career. The focus of this course is to provide students with a conceptual background in computer science. The major emphasis is on programming methodology, algorithm design, and object oriented programming in the Java language. This course prepares a student for advanced placement in a college computer science program by means of the Advanced Placement Exam. All students enrolled in AP courses are required to take the College Board’s Advanced Placement Exam.
981 Advanced Placement Microeconomics
1.0 credit Humanities, Technologies, & Arts Grades: 11, 12
Prerequisite: Completed or currently enrolled in Algebra II

This is a college level course that introduces students to the concept that economic questions exist because of scarcity, wants exceed the resources available to satisfy them, choices must be made and cost–benefit analysis can be used to understand and explore the smaller segments of the economy such as consumers and producers and how they interact in output markets and resource markets, and of course the impact of government policies on these economic units. This course follows approved AP curriculum. Students must take and pass the AP exam to be eligible to receive college credit.

000 AP Computer Science Principles Arriving 2017-2018
1 credit Human, Technologies, & Arts Grades: 9,10,11,12

AP Computer Science Principles is a new AP course offered by College Board which introduces students to the foundational concepts of computer science and challenges them to explore how computing and technology can impact the world. With a unique focus on creative problem solving and real-world applications, AP Computer Science Principles prepares students for college and career. This course exposes students to a broad range of technology concepts with the goal of creating leaders in computer science fields. Big ideas include creativity, abstraction, data and information, algorithms, programming, the Internet, and global impact.

000 AP Macroeconomics Arriving 2017-2018
1 credit Human, Technologies, & Arts Grades: 11,12

The purpose of the AP course in macroeconomics is to give students a thorough understanding of the principles of economics that apply to an economic system as a whole. The course places particular emphasis on the study of national income and price-level determination, and also develops students’ familiarity with economic performance measures, the financial sector, stabilization policies, economic growth, and international economics.

Family and Consumer Sciences

601 Fundamentals of Foods and Nutrition
0.5 credit Humanities, Technologies, & Arts Grades: 9, 10, 11, 12
Lab Fee: $25

This course introduces students to the art and science of cooking. Students will learn how to prepare foods focusing on the areas of dairy, vegetable, meats and grains as well as foods from many different cultures. Students will also be participating in the original recipe competition at Celebration of the Arts. The final exam will help focus on how current food choices will affect their health today as well as in the future. Students have the opportunity to explore careers in the foods and nutrition industry.

602 Focus on Foods and Nutrition
0.5 credit Humanities, Technologies, & Arts Grades: 9, 10, 11, 12
Lab Fee: $25

In this course, students use up-to-date technologies such as the food processor, microwave and convection oven to prepare both familiar and new dishes. Culinary principles will be applied to foods including eggs, chicken and fruit. Students will prepare traditional and interesting foods such as chicken parmesan, Hungarian goulash and baked Alaska. Using sophisticated diet analysis software, students will evaluate numerous foods as well as their overall nutritional health. Students have the opportunity to explore careers in the foods and nutrition industry.
603 Advanced Food Preparation
1.0 credit
Humanities, Technologies, & Arts
Grades: 10, 11, 12
Lab Fee: $45
Prerequisite: Successful completion of 601 or 602

Advanced Food Preparation is for any student who wants to learn the tricks involved in making even a simple meal look exciting and complicated. This course includes the study of advanced cooking techniques used in the preparation of such foods as soups, sauces, gingerbread houses and much more. Home cooking projects utilize complex diet analysis software to aid in meal planning. Regional cuisines including French, Italian, Chinese, and American will be examined in detail. Test your skills by designing and creating a piece of edible art for the cake decorating competition at Celebration of the Arts.

605A The Science of Food through the Lifespan
.5 credit
Humanities, Technologies, & Arts
Grades: 10, 11, 12
Lab Fee: $35
Prerequisite: Successful completion of 601 or 602

Travel your life span on culinary terms. How should you eat to maintain a healthy body? What foods should be consumed or avoided during pregnancy? What foods help an infant thrive? How do you feed yourself well when you are on very tight budget? How do nutritional needs change as we age? Learn the answers to these questions as well as many others such as the science behind candy making and how our environment affects our food needs and choices.

611 Interior Design and Housing
0.5 credit
Humanities, Technologies, & Arts
Grades: 10, 11, 12

In this course students will study the elements of interior design and learn how to use them in various living environments. Students will design floor plans and analyze room usage and traffic patterns in order to determine the best ways to utilize the space and furnishings. Color schemes as well as furniture styles, selection and placement will be examined by both personal experimentation and computer. Major projects include a personal home improvement project and a dream room design and presentation board.

620 Child Development
0.5 credit
Humanities, Technologies, & Arts
Grades: 9, 10, 11, 12

This course deals with the development of a child and the issues s/he may face as they grow up. The influence of the family and the impact of the way basic needs are met early in life are examined. Students will study and practice practical ways to communicate with both children & adults. Differences between boys and girls will be observed and analyzed as well as each facet of how a child develops. Special relevant issues such as labor and childbirth, the importance of play and the building of good self-esteem will be discussed. This is a valuable course for those interested in career areas such as early childhood/elementary or secondary education, day care supervision, special ed, social work, child psychology, pediatric medicine and parenting.

621 Child Development II: Preschool
1.0 credit
Humanities, Technologies, & Arts
Grades: 10, 11, 12
Prerequisite: Strongly recommended to take Child Development as a prerequisite to CD II

This course allows students to study the development of children in a more up close and personal way by working with real children, ages 3-4 years old, in a preschool setting. Students will have the opportunity to gain skills writing lesson plans, teaching lessons, and supervising activities in Rainbow Junction, our in-house preschool program, all while learning to work with a team of fellow classmates. Students will discover how to motivate, discipline, and supervise children while learning how to plan age-appropriate lessons and activities. This course provides a more practical, in-depth hands-on experience for students who are interested in working with children in any capacity.

622 Child Development III: Advanced
.5 OR 1.0 credit
Humanities, Technologies, & Arts
Grades: 11, 12
640  Real World: Managing Relationships and Money
0.5 credit  Humanities, Technologies, & Arts  Grades: 11, 12
This course fulfills the Personal Finance and Money Management requirement.

Life on your own will be the focus of this course. Managing your own checkbook, establishing good credit, determining costs for major life events (wedding, buying a house, having a baby) will all be examined as well as learning to handle paying monthly bills while balancing personal and family life. The psychology of relationships and higher level communication skills are the focus while integrating all parts of financial matters during the life cycle. Practical, hands-on methods are applied for successful learning. Research strategies are developed and curriculum directed projects are worked on in cooperative groups.

641  Core Communication and Future Planning Skills
0.5 credit  Humanities, Technologies, & Arts  Grade: 9
This course is strongly recommended for all freshmen. The design of this course is to introduce students to the fundamentals of communication and the psychology of relationships. The emphasis is on verbal and nonverbal communication and relationship intelligence. Several practical exercises in public speaking will provide the students with oratorical experience needed in post-secondary education and the world of work. The essential elements of this course revolve around The 7 Habits of Highly Effective Teens. The students will investigate a career path, write a resume, practice interviewing techniques, and learn fundamental relationship skills to better communicate with family, teachers, peers, bosses, and coworkers. These components are designed to meet the individual needs of all students as they pursue their high school education.

Industrial Technology

701A  Industrial Materials I
1 Semester  -  .5 credit  Humanities, Technologies, & Arts  Grades: 9,10,11,12
Lab Fee:  $35

The Industrial Materials program is described as “Creativity through Problem Solving.” Students have every opportunity to design and create amazing pieces of decorative and functional art from beautiful woods. Students will develop an appreciation for fine quality and attention to detail through their creations. Industrial Materials I is just the first of four levels that students can experience in the program – many families have a house full of beautiful furniture built entirely by hand from these courses. Take this first-level course to gain the expertise and hopefully have your creations published nationally as many students have already achieved. Design examples include detailed jewelry boxes, clocks, small pieces of furniture, or anything that your mind can create! Even if you have absolutely no experience, you should expect success and be prepared to take home pieces you will be extremely proud to display. Evaluation is based on safe lab procedures and work habits. Emphasis is placed on meeting individual needs, working safely, and preparing for “Celebration of the Arts” to showcase student work. Please view over 100 student creations at www.ssdcougars.org/webpage/gtrout and be amazed!

702  Industrial Materials II
Full year  -  1.0 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12
Prerequisite:  Successful completion of 701
In Industrial Materials II students will refine their problem-solving and creative skills practiced in Industrial Materials I and work on advanced techniques such as creating intricate moldings, carvings, or any design their minds can create as part of their artistic masterpiece. Students have virtually no limitations in their designs and have the opportunity to receive advanced instruction through open lab work sessions after school and in the evenings. Our students have designed nearly every piece of furniture imaginable over the past 28 years and have been featured in 33 national and international publications, as well as displayed at the Philadelphia Furniture Show. Projects include complete bedroom and dining room sets, pool tables, sideboards, armoires, pianos, harpsichords, Victorian desks, and even a Model –T truck. Course activities will require students to design and create a major piece of furniture...or more! Evaluation is based on lab procedures, safe work habits, and preparation for the “Celebration of the Arts” to showcase student work to the public. Please view over 100 student creations at www.ssdcougars.org/webpages/gtrout and be amazed! These advanced students are responsible for their chosen materials.

703  Industrial Materials III
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of 702 and teacher approval

Two years of Industrial Materials II, Independent Studies are available and encouraged for those students who truly wish to make the most incredible artistic creations possible! View www.ssdcougars.org/webpages/gtrout highly motivated students may exceed 1.0 credits per year if their schedule permits. These advanced students are responsible for their chosen materials.

710  Architectural Design I
1.0 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12

This very popular course has been designed to meet student’s desires to learn more about architectural design and engineering concepts. Emphasis will be placed on floor plan configurations, traffic flow patterns, adding twenty first century amenities, interior design, elevation drawings, understanding typical wall elevations/explored views, landscape design and the use of a 3D virtual reality software. Model Building will bring the theory to reality as students will build their “Dream House” from balsa wood in ¼ inch scale. Creativity, accuracy of plans to models and craftsmanship exhibited in building the model will be measured for final grade. Technical sketches will provide students with rendering skills (to shade their elevations) and be required in the areas of pencil, ink and colored prisma-color. Models and Technical Sketches will be put on display and judged at the annual Celebration of the Arts.

715  Engineering: Structural Design
0.5 Credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12
Lab Fee:  $35

This course offers students opportunities to explore pre-engineering and design concepts. Instruction will feature elements of the STEM curriculum (Science, Technology, Engineering and Math). A fully functional lab with computers, engineering conceptual modules and industry leading equipment will assist students in grasping content and assembling prototypes. The project based curriculum emphasizes creativity in design, materials and construction techniques used today and in the future. Areas of study will include: architectural design and layout, structural engineering, manufacturing/building techniques and green energy alternatives. Solid Works and Google Sketch-Up software will enhance design creativity in a supportive learning environment. The course has been developed to provide twenty-first century technology, combined with a team approach to create solutions generated by design challenges. Design briefs are used to describe the real life situation to provide an authentic learning experience. Students interested in exploring engineering as a career and learning while having fun should strongly consider this course!

716  Fabrication Technology: Robotics
0.5 Credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12
Lab Fee:  $35

Have you ever wanted to build a Robot or UAV (Unmanned Aerial Vehicle)? Use a Laser Engraver to etch images onto products? Program a CNC Mill to fabricate distinct parts? . . . . Then our new Fabrication Technology course is for YOU! This course offers students opportunities to explore pre-engineering concepts in robotics, design and fabrication. Instruction will feature elements of STEM curricula (Science, Technology, Engineering and Math). A fully functional lab with computers, engineering conceptual modules and industry leading equipment will assist students in grasping the content. Projects will include fabrication and programming of a robot, and designing and manufacturing using a CNC/Laser. Course emphasis will be placed on a hands-on
curriculum that features creativity in design, and materials and fabrication techniques used today and in the future. Areas of study will include: CNC G-Code programming, robotics engineering, laser technology and manufacturing and assembly techniques related to core design prototypes. Solid Works and Google Sketch-Up software will enhance design creativity in a tech driven learning environment. This course has been developed to provide twenty-first century technology, combined with a team approach to create solutions generated by design challenges. Design briefs are used to describe real life situations to provide an authentic learning experience. Students interested in understanding how products are fabricated should join us in exploring engineering in an entirely new way.

731A Graphic Arts & Design I
0.5 credit Humanities, Technologies, & Arts Grades: 9, 10, 11, 12

SHS Graphic Design I is a semester long class that gives students the opportunity to learn and apply design principles and industry standards of graphic arts and design. Using art, color, design, layout and typography, the SHS Graphic Design I students will be able to create professional looking illustrations and designs. They will choose, alter, and manipulate art both mechanically and digitally to produce various visual images and forms. Students will learn how to use Adobe Illustrator and Photoshop, as well as traditional design tools and techniques. This is a project based course that teaches the necessary skills through hands-on application. Students will demonstrate the skills learned through a variety of challenging design projects. Projects include: Cover design - magazine cover (Semester 1) or cover design for the Springfield Press St. Patrick’s Day edition (Semester 2), Holiday Greeting Card design, Company Branding project including logo design, and business cards. Final project: Inspirational Typography poster. Students will use acquired typography and design skills to create a wide format poster with an inspirational message for incoming freshmen to SHS. There is no limit to creativity. A good imagination, combined with acquired technical skills over the course of the semester, will provide for a great learning experience that can be transferred to other areas of academic, as well as occupational life.

732 Graphic Arts & Design II
1.0 credit Humanities, Technologies, & Arts Grades: 10, 11, 12
Prerequisite: Successful completion of 731

This is a yearlong, project-based course that develops career and communication skills in print production and graphic design, using Adobe tools and various output media. These key skills are developed in a spiral-each project adds more challenging skills to foundation proficiencies. Students experience subject areas and skills across careers in graphic design, photography, print and layout design, and production.

Course Content:
- Understanding the fundamentals of design
- Applying the Design Problem Solving Process
- Advanced understanding of the Adobe tools and where best to apply them. (Adobe Illustrator, InDesign, Photoshop, and Bridge)
- Peer editing and evaluation in a collaborative environment
- Technical image manipulation and print publishing skills
- Digital and hand illustration, and coloring/shading
- Communication and collaboration with peers and team members, using project plans or specifications
- Technical graphic and print-production skills such as creating vector-based graphics and filters. Scanning and digital touch up, understanding resolution and image size for different outputs.
- Design solutions, including multi-page and double-page layouts
- Possible Projects:
  - Brochure/Newsletter InDesign/Photoshop
  - Digital Ap Design Illustrator
  - Prisma-Color Design Project Illustrator and Prisma Pencils
  - Branding (Multiple projects) Illustrator/InDesign
  - Packaging Design Illustrator
  - Info-graphic Poster Illustrator

733 Graphic Arts & Design III – Advanced Print and Digital Media
1.0 credit Humanities, Technologies, & Arts Grades: 11, 12
Prerequisite: Successful completion of 732 and teacher recommendation

This is a yearlong, project-based course that develops career aptitude for graphic design through application. Graphic Arts and Design III students will provide the SHS District and community a service in print production and graphic design based on district and community requests/needs.

- SHS School District print production using graphic design tools
- Individual Digital Portfolio creation using Adobe tools

Through district and community projects, Independent Study students will experience real world challenges in graphic design and print production.

### 734 New Course: Digital Painting and Illustration

0.5 credit  
Humanities, Technologies, & Arts  
Grades: 9, 10, 11, 12

Digital Painting and Illustration is a semester long course that focuses on digital computer painting and illustration techniques. Students will learn to use the tools and techniques of digital painting using Adobe Photoshop, Illustrator and a Wacom tablet to produce digital art. Students will also learn basic drawing skills, the traditional drawing concepts of basic composition and design, the use of shadows and highlights to create the illusion of volume, and how to use atmospheric and linear perspective to create the illusion of space.

Students will explore how these skills can be used with applications to the fields of game design and animation, such as animation backgrounds, textures for 3D animation, concept art, and illustration.

---

### Communications & Video Production

#### 770 Television Production: Multi-Camera Production

0.5 credit  
Humanities, Technologies, & Arts  
Grades: 9, 10, 11, 12

This course focuses on multi-camera video productions. Students learn the basics of scriptwriting, directing, audio, lighting, camera operation, and graphics for video. These skills are incorporated into the production of a series of video projects that include instructional videos, public service announcements, and dramatic scenes. Students will learn how to use the equipment in the studio setting, and then over the course of the semester, will also learn how to transport and set up the equipment on location. Students who have taken this class will have the opportunity to participate in the recording and broadcast of special televised events such as COTA and the Dance Marathon.

#### 771 Television Production: Film-Style Production

0.5 credit  
Humanities, Technologies, & Arts  
Grades: 10, 11, 12

Much of today’s video production equipment is portable; therefore, many productions are shot on location. The course teaches students to create videos that are shot on location and edited in the studio. Emphasis is placed on the writing of treatments, scripts, and storyboards, single camera shooting, and non-linear editing techniques. Students will work in small teams and produce a series of videos including (but not limited to) a stop-motion animation, a Public Service Announcement, a music video, and a short film. Students who have taken this class will have the opportunity to participate in the recording and broadcast of special televised events such as COTA and the Dance Marathon.

#### 773 Broadcast Journalism

1.0 credit  
Humanities, Technologies, & Arts  
Grades: 11, 12

Prerequisite: Successful completion of 770 or 771

In Broadcast Journalism, students will be taught the skills of story selection, news writing and delivery, along with basic and advanced TV Production skills. The class will produce weekly announcements for the high school delivered via the web. In addition, students will produce a series of news reports on various subjects that will be shown in the high school, and on SETv. Students in this class will be assigned a specific job or leadership role based on their abilities and experience, and will treat their time in the class like a work day in a television news studio. Students who have taken this class will have the opportunity to participate in the recording and broadcast of special televised events such as COTA and the Dance Marathon.
Advanced Video Production provides the opportunity for students who have succeeded in the other video production classes to further develop their skills. This course is intended for students who have completed both Multi-Camera Video Production (770) and Film-Style Video Production (771). Students in this class will work individually and in small groups producing content for The Growl, our weekly video announcement program, as well as content for SETv, the district cable channel. Work in this class may also include special projects at the request of the staff and administration of SHS. In addition to the video equipment and editing software used in previous classes, students in this class will also learn basic special effects through Adobe AfterEffects. This class requires a strong work ethic and a high standard for quality since all work completed for this class is intended for broadcast inside and outside of the school building.

Documentary Video Production is an advanced-level video production course that allows students to work individually on three documentary videos of increasing length. The choice of subject matter is completely the prerogative of the student. Students will work through the entire process of developing an idea, doing research, collecting interviews, storyboarding, writing, shooting, and editing. All completed videos will be considered for broadcast on SETv, and may be entered into contests, when available. This is a perfect class for a creative, tech-savvy student who wants the opportunity to work individually, and produce projects that could be used as a portfolio piece or demo reel in the future.

Students will become comfortable in speaking before an audience in formal and informal situations. Students in this course will participate in a variety of speaking situations including informative, persuasive, and narrative. They will evaluate speeches, express individual opinions, and work on speech projects with peers. The instructor and the class will evaluate the performance of speaking exercises based on specific oral presentation skills instructed in class. Students will also learn the language of communication and the importance of both verbal and nonverbal communication when communicating with an audience. Students will realize the value and skill of integrating technology to enhance presentations.

Students will develop self-confidence in this course, both as performers and as individuals. They will receive a general orientation to the Stanislavski "Method" of acting. Course activities include extensive work in improvisation, characterization, stage movement, monologues, and scene work. Class and teacher viewing of performances and class participation are included in the evaluation of students.

Delving further into the acting skills and techniques introduced in "Introduction to Acting", students will explore and perform contrasting monologues from published plays, as well as one scene in a safe and supportive atmosphere. Understanding the dramatic text, communicating with a fellow actor, and discovering personal connections to a character and scene are just some of the benefits of this class. Public performance will again be stressed with students performing scenes and plays on stage at Celebration of the Arts.
850  Principles of Leadership
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12  HAC Access
Prerequisite:  Students taking this course should be part of a leadership structure for a sports team, club, or other organization. Students may be required to submit a leadership profile for review.
This course will engage students in determining their own strengths and weaknesses as leaders. It will enable students to overcome leadership obstacles so that their student-run activities or sports teams can be efficient, organized, and exciting. Students will explore 17 leadership characteristics by examining both current and historical leaders and role models and then utilize these characteristics in classroom leadership activities. The reading and analysis of current leadership models, publications, and other literature will allow the students to apply the concepts to their developing leadership style. Guest speakers will make presentations to the class.

Art

801  Studio Art
0.5 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12

Studio Art provides the opportunity for beginning art students as well as more advanced students to experiment with concepts, methods, and materials in the following areas: design, drawing, print-making, painting and 3-D design. By studying the contributions of artists past and present and participating in studio work and critiques, students will gain a more critical appreciation of the value of art. Students will use the Internet as a research tool for art historical information. Students will be required to enter at least one piece of their artwork in the Celebration of the Arts exhibit. Students are required to supply an artist's sketchbook.

803  Drawing and Design
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12

This course will allow students to study fine art and commercial art in depth and develop a strong portfolio. Students will explore career opportunities in art and discuss art careers with an art school representative. Students will focus on observational drawing skills, principles of design, and color theory. Students will regularly engage in self, peer, and group critiques. Students will use the Internet as a research tool for art historical information as well as becoming familiar with contemporary artists. Students will be required to enter at least one piece of their artwork in the Celebration of the Arts exhibit. Students are required to supply an artist's sketchbook.

805  Painting and Drawing
0.5 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12

Students in this course will develop drawing techniques in pencil, charcoal, pastel, and pen and ink as they are used in fine and commercial art. Course activities will include participation in self, peer, and group critiques; exploration of career opportunities in art; familiarization with significant periods in art history; exhibition of work in local, regional and national competitions; and the opportunity to draw life and imagination. Students will develop painting techniques as they are used in fine and commercial art. Media used in class may include tempera, acrylic, and watercolor. Students will use the Internet as a research tool for art historical information. Students will be required to enter their work in the Celebration of the Arts exhibit. Students are required to supply an artist's sketchbook.

807  Honors Art
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of two of the following courses: 801, 803, or 805

Students going onto Advanced Placement Art will use this class to begin developing the breadth sections of their Advanced Placement Portfolio. This course will provide a variety of experiences in the formal, technical, and expressive means available to an artist. Students will explore career opportunities in art, discuss art careers with an art school representative, refine their observation skills, research art historical information on the Internet, and become familiar with contemporary artists. Students will hang an exhibit of their work at the Celebration of the Arts. All Honors Art students will be required to have a large sketchbook and also a small sketchbook used for the purpose of outside independent required projects. This course is designed for the serious art student contemplating art school.
809 Printmaking  
0.5 credit  Humanities, Technologies, & Arts  Grades: 10, 11, 12

This course will expand artistic expression, technical skills, and knowledge of the use and meaning of the print. Lessons include but are not limited to: mono-print, collograph, relief, intaglio, and silkscreen processes. Students will make historical, cultural and cross-curricular connections. Art work will build on previous experiences in art and knowledge of the Elements of Art and the Principles of Design. Students will use the Internet to research a variety of contemporary and historical prints and the artists who created them. Students will try experimental and collaborative activities; participate in critiques; and exhibit their work in the Celebration of the Arts.

811 Functional Ceramics  
0.5 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12  
Lab Fee: $18

Ever look around your home and notice all the functional objects made of clay? Plates, cups, mugs, pitchers, platters, vases, salt and pepper shakers, bowls... Ever wish you could learn to make pottery on the potter’s wheel? Here’s your chance to create some amazingly beautiful and functional pottery for your own use. Is it easy? Not always. Will you get dirty? Yes. Will it be worth all the effort and the dirt? Absolutely! You’ll have the opportunity to experiment with a wide variety of concepts, methods and techniques. While learning about cultural artistic heritage and participating in studio work and critiques, you’ll create original designs for your own functional pottery. Using handbuilding techniques and the potter’s wheel, you’ll bring your designs to life. Digital portfolios are used to document your progress, processes and problem-solving strategies. All students are required to enter at least one piece in the Celebration of the Arts exhibit. **There is an $18 lab fee for this course.

813 Sculptural Ceramics  
0.5 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12  
Lab Fee: $18

At the core of this course are the basic questions of any artist: How does your sculpture reflect who you are, what you think and what you feel? As a sculptor, how do I communicate meaning? You will have the unique opportunity to explore the world of sculptural ceramics – by studying contemporary ceramic sculptors such as Victor Spinski, Beth Cavener Stichter, John Brickels and Adrian Arleo. This project-based course links studio work and critiques to artistic/cultural heritage. Students will focus on meaning and symbolism in art as it relates to their artwork and to the artwork of professional artists; continually asking themselves how their in-class learning connects with their lives and to the larger world of art. The Internet is used as a research tool. Using a digital portfolio, students will document their progress and problem-solving strategies. Students are required to enter at least one piece in the Celebration of the Arts exhibit. **There is an $18 lab fee for this course.

815 Tile Making: Impression and Expression  
0.5 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12  
Lab Fee: $18

A unique combination of drawing and ceramics, the tile artwork at Celebration of the Arts never fails to delight and inspire the viewers. Students learn several techniques for creating tiles, including stamping, mold making, picture mosaics and traditional mosaics. All the phases of tile making, including creating an original design, working with clay, glazing, gluing and grouting, will be experienced firsthand. This exciting course focuses on personal expression as it is linked to artistic and cultural heritage – specifically Pennsylvania tile artists - and on participation in studio work and critiques. The Internet is used as a research tool. Using a digital portfolio, students will document their progress and problem-solving strategies. Students are required to enter at least one piece in the Celebration of the Arts exhibit. **There is an $18 lab fee for this course.

817 Primitive Ceramics: Earth, Air, Fire and Water  
0.5 credit  Humanities, Technologies, & Arts  Grades: 9, 10, 11, 12  
Lab Fee: $18

We go seriously old school in Primitive Ceramics. By experimenting with primitive techniques including: creating your own clay bodies (meaning we will walk to the creek and dig up and process our own clay), burnishing, smoke-firing, traditional and horsehair raku, and alternative finishes (we often use fire as a tool in this course). The results are often unpredictable and always
beautiful. Focusing on independent research and design; students study several early civilizations and their hand-constructed pottery-making/sculpture techniques. The Internet is used as a research tool. Using a digital portfolio, students will document their progress and problem-solving strategies. Students are required to enter at least one piece in the Celebration of the Arts exhibit. **There is an $18 lab fee for this course.

819 Sculpture  
0.5 credit Humanities, Technologies, & Arts Grades: 10, 11, 12  
Lab Fee: $18

How often in your lifetime are you going to get the opportunity to carve stone?! Here's your chance to take on an unusual challenge. This rigorous and exciting course provides the opportunity for students to explore the fine art of sculpture. Areas of study include sculptural aesthetics, history, criticism and production. Students will explore major principles, concepts, techniques, materials, and tools of the sculptor. While the main project in this course is a stone carving using alabaster or soapstone, we also use a variety of other materials such as plaster, Pariscraft, found objects, clay, paper and wood on smaller projects. In this project-based course, students do independent online research and create original designs for their sculptures. Using a digital portfolio, students will document their progress and problem-solving strategies. Students are required to enter at least one piece in the Celebration of the Arts exhibit. **There is an $18 lab fee for this course.

824 Special Effects Photography  
0.5 credit Humanities, Technologies, & Arts Grades: 10, 11, 12

Special Effects Photography allows students to successful expand their technical knowledge of photographic techniques by experimenting with effects photography. Examples of assignments are light drawing, Bokeh, compositing, double exposure, tilt shift, grunge, HDR, and many other lens effects. With the help of high end photographic equipment and editing suites such as Adobe Photoshop and lightroom students will push their imagination to create unique imagery. During the creative process students will need to solve challenging creative problems unlike any other course offered at SHS. The course is constructed to make even the amateur photographer successful. Students may borrow a digital camera from the photography department, but having a camera of their own would be extremely beneficial. Please visit the SHS photography website at www.shsphotography.shutterfly.com for information and examples of projects. Like all special area courses, student work will be proudly displayed in Celebration of the Arts near the end of the 2nd semester. There is a $25 lab fee for this course and a mandatory online waiver form that must be completed to borrow equipment.

826 Portrait Photography  
0.5 credit Humanities, Technologies, & Arts Grades: 9, 10, 11, 12

Portrait Photography’s focus is the creative process of depicting people from strangers to friends and family. Students will explore portraiture utilizing many photographic techniques and projects such as self-portraiture, faceless portrait, indoor and outdoor portraiture, pet/animal photography, multiple subject portraiture, and sports photography. Along with class assignments students will photograph their environment and learn about photographic journalism. They will have the option to submit their work for publication in various school and community outlets such as the Spry-Hian, Yearbook, the district website, and others. Students will learn and utilize the most basic concepts of a DSLR camera as well as their phones to produce creative and journalistic work. With the help of high end photographic equipment and editing suites such as Adobe Photoshop and Lightroom students will push their imagination to the limits and learn in a 21st century environment. Students may borrow a digital camera from the photography department, but having a camera of their own would be beneficial. Like all special area courses, student work will be proudly displayed in Celebration of the Arts near the end of the 2nd semester. There is a $25 lab fee for this course and a mandatory online waiver form that must be completed to borrow equipment.

827 Digital Photography  
0.5 credit Humanities, Technologies, & Arts Grades: 9, 10, 11, 12

Digital Photography is a course dedicated to the ever changing technological advances in the world of photography and design. Students will have the opportunity to learn the benefits of digital imagery, how to operate Canon DLSR cameras, various lenses, tripods, and other photographic equipment. They will also learn the role of digital photography in the world through "visual literacy" and become acquainted with the world’s leading photograph editing software Adobe Lightroom to enhance their photographs for print and web based interfaces. Students will complete various assignments such as panoramic, macro, still life, lowlight,
architectural, and minor effects photography. To complete the assignments students will have the opportunity to sign-out school provided equipment with parental permission. Students may borrow a digital camera from the photography department, but having a camera of their own would be beneficial. Like all special area courses, student work will be proudly displayed in Celebration of the Arts near the end of the 2nd semester. There is a $25 lab fee for this course and a mandatory online waiver form that must be completed to borrow equipment.

829H Honors Photography
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of the following courses (824, 826, and 827)

This course is for the highly motivated photographer who wants to perform at a college level while still in high school. The honors photography course is the perfect stepping stone to AP Photography and will be used as a benchmark entering the AP course (829). This will require independent work, goal setting, planning skills, and ongoing communication with the teacher. The 15 images created will be a combination of teacher assigned and student driven projects. Students will strengthen many photographic skills, including comprehensive technical knowledge of their camera, professional use of software and printing output options, as well as brainstorming critical creative problems. This course provides the experience of taking the Advancement placement course with a more controlled workload designed deliberately to prepare students for the AP experience. Writing skills and the ability to improve upon them are a must for the student to succeed in this independent atmosphere. Continued use of the photography journal is expected and encouraged. Please visit the SHS photography website at www.shsphotography.shutterfly.com for information and examples of projects. There is a lab fee for this course that will be calculated after enrollment is complete, as well as a mandatory online waiver form that must be completed to use and borrow equipment.

Advance Placement Courses

828  Advanced Placement Studio: Art 3-D
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of the following courses (811, 813, 815, 817, and/or 819)
Teacher Recommendation Only
Lab Fee:  $18

The Advanced Placement 3-D course focuses on individual exploration and study using a broad interpretation of sculptural issues. A variety of approaches to representation, abstraction, and expression may be part of the student’s portfolio. These may include traditional sculpture, architectural models, apparel, ceramics, three-dimensional fiber arts or metal work. Students develop a body of 3-D artwork which will be submitted in digital slide form to the College Board for evaluation and potential college credit. Portfolios are made up of three sections: Quality (10 slides) • Concentration (12 slides) • Breadth (16 slides). Each student is required to create an artist’s statement for the AP portfolio. Students must submit and complete an AP portfolio in order to receive AP grade weight. **There is an $18 lab fee for this course.

829  Advanced Placement 2D Design Portfolio: Photography & Design
1.0 credit  Humanities, Technologies, & Arts  Grades: 11, 12
Prerequisite:  Successful completion of the following courses (824, 826, and 827)
Teacher Recommendation Only

This course is for the highly motivated design student who wants to perform at a college level while still in high school. This will require independent work, goal setting, planning skills, and ongoing communication with the teacher. The 29 images created will fill the required “Quality,” “Concentration.” and “Breadth” sections of the College Board Advanced Placement 2D Design Portfolio. Students will strengthen their photographic skills, including comprehensive technical knowledge of their camera, professional use of software such as Adobe Photoshop, Illustrator, Lightroom, In-Design, and other web based applications to explore printing output options, as well as solving creative problems. Much of the thematic design of their self-driven assignments will be based on their proposed “Visual Idea”. The course culminates in May with the submission of a portfolio to the Ap college board, as well as presentation of the student’s portfolio on a visual installation called a “Wall” at Celebration of the Arts. Writing skills and the ability to improve upon them are a must for the student to succeed in this independent atmosphere. There is a $150 lab fee for this course, an $85 dollar Advance Placement testing fee, and a mandatory online waiver form that must be completed to borrow equipment. This course is taught completely with digital technologies. This course provides the opportunity for students to earn honors weight by fulfilling additional requirements outside of the school day. See director for more information.
Advanced Placement Studio Art: Drawing
1.0 credit
Humanities, Technologies, & Arts
Grades: 11, 12
Prerequisite: Successful completion of the following courses (801, 803, 805, and 807)
Teacher Recommendation Only

This course enables highly motivated students to perform at the college level while still in high school. Students will focus on developing a sense of excellence in art and an in-depth commitment to a particular artistic theme. These works will represent the required Quality and Concentration sections in their Advanced Placement Portfolio. Students will strengthen their drawing skills through intense study of the human figure, geometric compositions, and landscape. Various media will be explored in black and white, and color. Projects will range from photo-realism to imagination compositions. Students will use the Internet as a research tool. It is expected that all course participants will take and submit an AP portfolio in May and exhibit their work in Celebration of the Arts. Students are expected to supply an artist’s sketchbook.

Music

Music, Interactive Media & Your World (formerly American Music Scene)
0.5 credit
Humanities, Technologies, & Arts
Grades: 9, 10, 11, 12

This course explores the development and patterns of popular music in the worlds that we live in and “play” in: Film, Television, Animation, Video Game, Smart-phone, Tablet, Commercial, Advertising, and Studio Music. Students will study historical creative processes and recordings of how music has evolved to its current state; integrating their skills to become informed consumers and creators!

Music Production I
0.5 Credit
Humanities, Technologies, & Arts
Grades: 9, 10, 11, 12

Open to all students, Grades 9 through 12. No prior music experience required besides a devoted interest in music and the music industry OR Sound Engineering OR Communications.

All-Inclusive Music Studio, Industry, Technology, & Composition Course. Learn about Production processes - composing, recording, editing, mixing, mastering, and tools available to you. Functional Piano and Guitar Skills will be introduced. The physical and compositional aspects of music, sound, recording and production techniques are explored and demonstrated. Production and Post-Production techniques are explored, with special emphasis on Music Editing, Composition, and Sound Design. Studio Lab Assignments reinforce topics covered. Summative assessments include individual projects such as live recording, mixing and mastering of Music Department events at Springfield High School (i.e. Winter and Spring Concerts and any events requested by Springfield High School that our students can offer their services for) and collaborative Compositional Projects. Internships in the Music Industry and Music Studios are explored. Springfield Record Label will be an integral, technological part of the Springfield High School Music Department; extending curriculum to compliment interdepartmental Television, Film, Animation and Multimedia Curriculum.

Symphonic Band
1.0 Credit
Humanities, Technologies, & Arts
Grades: 9, 10, 11, 12

Pre-requisites: Participation in the middle-school band program, previous instrumental music experience, or audition with the Band Director.

Additional Information: This course provides the opportunity for students to earn Honors Weight by fulfilling additional requirements outside of the school day. See Band Director for more information.

Symphonic Band is a performance, academic, and co-curricular ensemble open to students in Woodwind, Brass, and Percussion students in Grades 9 through 12. Students study and rehearse Band and Wind Ensemble literature of various styles and difficulty in this class. Emphasis is placed on fundamentals of musicianship. Students refine performance technique and ensemble playing. Performances, concerts, and rehearsals outside of the school day are required. Students are encouraged to study privately on their individual instruments. As a co-curricular class, students enrolled in Symphony Orchestra/Band are expected to participate in Marching Band; the performance ensemble who participates in Parades and events for our Springfield and Morton communities.
Exemptions from specific marching band performances, rehearsals, or events during the fall may be considered at the discretion of the Band Director. Please see springfieldcougarsmusic.org for the two kinds of Marching Band tracks we offer at Springfield High School; “Parade Band” and full-time “Marching Band”.

**857 Orchestra**

1.0 Credit  
Humanities or Music Credit  
Grades: 9, 10, 11, 12

Orchestra is an ensemble of performers who play stringed instruments. String players are eligible for inclusion by participation in the middle school program or by audition with the instructor. Standard orchestra literature and lighter selections are rehearsed and performed to gain an understanding of various periods and styles of music. Required concerts and performances are presented in the evenings throughout the school year. There is a uniform cleaning fee.  
This course provides the opportunity for students to earn honors weight by fulfilling additional requirements outside of the school day. See director for more information.

**853 Symphony Orchestra/ Band**

1.0 Credit  
Humanities, Technologies, & Arts  
Pre-requisites: Audition or Approval by the Director.

Additionally: This course provides the opportunity for students to earn Honors Weight by fulfilling additional requirements outside of the school day. See Band Director for more information.

Symphony Orchestra/Band is a performance, academic, and co-curricular ensemble open to auditioned Woodwind, Brass, and Percussion students in Grades 10 through 12 who have completed 1 year of Symphonic Band. Students study and rehearse both Band and Orchestra literature of various styles and difficulty in this class. Emphasis is placed on fundamentals of musicianship. Students refine performance technique and ensemble playing. Performances, concerts, and rehearsals outside of the school day are required. Students are encouraged to study privately on their individual instruments. As a co-curricular class, students enrolled in Symphony Orchestra/Band are expected to participate in Marching Band; the performance ensemble who participates in Parades and events for our Springfield and Morton communities. Exemptions from specific marching band performances, rehearsals, or events during the fall may be considered at the discretion of the Band Director. Please see springfieldcougarsmusic.org for the two kinds of Marching Band tracks we offer at Springfield High School; “Parade Band” and full-time “Marching Band”.

**860 Concert Choir**

1.0 Credit  
Humanities or Music Credit  
Grades: 9, 10, 11, 12

Every student will be given the opportunity, encouragement, and assistance to develop the fundamental skills essential in achieving a high standard of vocal performance, good tone quality, accurate intonation, correct breathing, clear diction, and an awareness and sensitivity for artistic interpretation. Required concerts and performances are the Winter Concert, Spring Concert, and Graduation. In addition to regular class time, every student will be required to attend evening rehearsals prior to each concert as listed on the yearly Choral Department Calendar and in the Choral Department Handbook. There is a nominal uniform cleaning fee. This course provides the opportunity for students to earn honors weight by fulfilling additional requirements outside of the school day. See Director for more information.

**861 Springfield Singers**

1.0 Credit  
Humanities or Music Credit  
Pre-requisite: Audition  
Grades: 9, 10, 11, 12

The Springfield Singers is a select group whose membership is by audition only. The fundamental skills essential in achieving a high standard of vocal performance will be stressed. Emphasis will be on ear training, sight singing and application of basic music theory. A higher level of difficulty of choral literature will be learned. Springfield Singers are also members of the Springfield Blue and Gold Concert Choirs. Required concerts and performances are listed on the yearly Choral Department Calendar and in the Choral Department Handbook (including: Winter Concert, Spring Concert, Jazz Concert, Graduation). In addition to regular class time, every student will be required to attend evening rehearsals prior to each concert. There is a nominal uniform cleaning fee. This course provides the opportunity for students to earn honors weight by fulfilling additional requirements outside of the school day. See Director for more information.
880  AP Music Theory

1.0 Credit  Humanities, Technologies, & Arts  Grades: 9-12

The ultimate goal of an AP Music Theory course is to develop a student's ability to recognize, understand, and describe the basic materials and processes of music that are heard or presented in a score. The achievement of these goals may best be approached by initially addressing fundamental aural, analytical, and compositional skills using both listening and written exercises. Building on this foundation, the course should progress to include more creative tasks, such as the harmonization of a melody by selecting appropriate chords, composing a musical bass line to provide two-voice counterpoint, or the realization of figured-bass notation.

Health and Physical Education

035  9th and 10th Health/Physical Education

036  11th and 12th Health/Physical Education

0.5 credit  Health/Physical Education Credit

Health and Physical Education is a 4 year requirement. The P.E. component is intended to improve the individual’s level of physical fitness, increase enjoyment of physical activity, and encourage more extensive strategies in a variety of sports. Students will develop skills in lifetime, team, and cooperative sports which may include tennis, golf, weight training, volleyball, badminton, pickleball, physical conditioning, table tennis, ultimate games, handball, indoor soccer, base games, speedball, and floor hockey. All students are required to wear a regulation gym uniform, sneakers, and socks. To receive full credit, students must be prepared with a gym uniform, attend class regularly, and participate in class activities. The Health component is designed to help students make healthy choices throughout their lifetime. Age appropriate topics related to phases of human development will be covered concerning social, emotional and physical well-being of the individual.

041  Health/Physical Education: Advanced

0.5 credit  Health/Physical Education Credit  Grades: 11, 12

Students will participate in a co-ed, intensified Physical Education experience. Points of emphasis will be placed on tournaments, rules and strategies, officiating and participating in unique physical education opportunities. Field trips and guest speakers may be part of this course along with activities that cannot be offered in the regular Physical Education classes. Students take this class in lieu of the regular Health and Physical Education class.
Dual and Concurrent Enrollment Courses
College Credit for High School Students

Springfield High School has partnered with Delaware County Community College to provide students in grades 11 and 12 the opportunity to earn college credit while still in high school through two methods – Concurrent Enrollment and Dual Enrollment. Concurrent Enrollment courses are offered on the High School campus during the school day and are taught by high school teachers who have been certified by DCCC to teach the courses. Dual Enrollment courses are offered and taken on DCCC’s campus. The positioning of these courses in the school day can present challenges. Every effort will be made to accommodate the time of these classes while still providing students with a full and robust schedule at SHS. We hope that you will consider some of these courses while planning your academic programming. Additionally, some of the DCCC courses are part of a Vocational Certification Program very similar to programs offered at Delaware County Technical Schools. These DCCC programs, listed below, are two year programs where students take courses at SHS for part of the school day and attend classes at DCCC for part of the day.

Note: Unless otherwise stated, all Dual and Concurrent Enrollment require the student to sit for DCCC Accuplacer assessment. Required scores may vary per course. See the DCCC counselor for more details.

Dual Enrollment Courses

Dual Enrollment ("DE") provides students with an opportunity to enrich their education with courses at Delaware County Community College that complement the classes already offered at Springfield. Please note that these DE courses cannot replace courses that are graduation requirements, and students cannot take a course that is already offered at Springfield HS for credit at the high school.

After they complete high school, students can transfer these credits directly to Delaware County Community College, or may transfer them to a four-year college or university. Students will work with their counselor and the Dual Enrollment Assistant Director to choose courses that will transfer to the four year school of their choice.

Students must apply to the program and placement test with the College in order to take Dual Enrollment courses. Please use Course Code DE 100 when completing your course requests to indicate that you are interested and your counselor will follow up with you to help select, apply for and schedule your dual enrollment course.

Tuition and deadlines are as follows:

<table>
<thead>
<tr>
<th>Standard Rate</th>
<th>Dual Enrollment Rate</th>
<th>Savings</th>
</tr>
</thead>
<tbody>
<tr>
<td>$330 per course</td>
<td>$120 per course</td>
<td>$210 per course</td>
</tr>
</tbody>
</table>

Application Deadlines

- Fall Semester – August 1
- Spring Semester – December 1
- Summer 1 – May 1
- Summer 2 – June 1
Popular DE courses at Springfield HS:

- Intro to Sociology
- Microeconomics
- Medical Terminology
- Construction First Aid & Safety
- Engineering Topics Seminar
- Introduction to Teaching

The Delaware County Community College course catalog can be accessed by clicking here.

Sample DE courses that align with Springfield’s emerging academy model:

*Please note that course offerings may be subject to enrollment trends and professor eligibility. The following list is merely an example, not a guarantee of course offerings.

Engineering, Mathematics, Science, and Technology

**BIO 115: Field Ecology**

Field Ecology is designed primarily for majors in biology, natural science, and related fields, yet is open to students of all majors. This course introduces students to the general principles of field ecology pertaining to terrestrial, aquatic, and marine habitats. Emphasis will be placed upon regional conservation issues, biodiversity concepts, plant and animal interactions and adaptations, effects of human disturbance on native flora and fauna, and field research techniques. Students are expected to develop and apply skills in field research and utilizing the scientific method.

**DPR 234: Introduction to Computer Game Programming**

This course teaches students the concepts of programming using the C++ language and DirectX. This course will introduce students to C++ Object oriented Programming, as well as, DirectX and its components. Students will create 2D and 3D objects, program animation sequences, add sound effects to games, create a virtual game world and program a full-featured role-playing game.

**TCC 112: CADD Graphics**

This course provides students with the concepts and skills necessary to form the basis of object visualization and documentation inherent to the creation and conveying of technical designs and drawings. Appropriate drafting concepts and skills are developed through use of both free-hand sketching and computer-assisted drafting. Instruction in the use of CADD systems is integrated with graphic theory throughout the course. The course covers theoretical and applied drafting concepts appropriate for conveying graphical representation of objects and designs in a variety of technical environments including manufacturing and construction, as well as architectural, mechanical and civil engineering design.

**TDD 216: Three-Dimensional CADD**

This course provides instruction in advanced computer-aided design and drafting (CADD) techniques in addition to creation of three-dimensional drawings. Students progress from two-dimensional projection to wireframe, surface modeling, solids modeling and rendering techniques. Emphasis will be placed on maximizing a personal computer-based
CADD system to develop a series of increasingly difficult drafting assignments and ending with a presentation quality final project and portfolio of completed drawings.

**AHM 233 Medical Terminology**

This course is designed to introduce the skills and knowledge needed to develop an understanding of the language of medicine. The mechanism of building a medical vocabulary, utilizing roots, prefixes, suffixes, and the combining forms, and the pronunciation are emphasized. A workbook/text, audiotapes, and computer software are used to give the student hands-on experience in the use of the language of medicine. *This course is required for the EMT certificate*

**Business**

**BUS 215: Human Resource Management**

This course presents an in-depth study of the principles of human resource management. The course presents both the theoretical and practical aspects of the broad human resource functions which managers must understand in order to develop an effective and productive workforce. Computer simulations and exercises are used to introduce students to the practical aspects of human resource management.

**BUS 105: Introduction to Entrepreneurship**

This class is an introduction entrepreneurial class for students interested in starting their own business. The ultimate goal of the class is to improve management, leadership, accounting and overall business skills and knowledge base for our entrepreneur students.

**HRM 100: Introduction to Hospitality**

This course introduces students to the vast lodging and food service industry. The origins and history of the modern American hotel/motel business and the enormous growth of the food industries are presented in the context of global tourism. Supervisory duties including organizational theory, resource management of the prime cost associated with these businesses, and asset control processes are introduced. Career opportunities are examined as an essential part of the course.

**PLG 100 Introduction to Paralegal**

This course focuses on four specific areas of the paralegal profession: (1) the role of the paralegal in the legal profession, (2) the legal and ethical rules that determine unauthorized practice, (3) an understanding of the judicial system at the federal, state and local level, and (4) the various areas of law-civil and criminal with emphasis on the legal terminology associated with each area. *Prepares students to enter into the paralegal AAS degree program*

**Arts**

**HUM 100: Introduction to Visual Arts**

This course is designed to introduce students, through a broad overview, to the nature of art, the people who make art, the various forms art takes and to the importance of art in our everyday lives. Students consider the role of the artist in society and how that role changes historically. Issues such as aesthetics, creativity and perception, and what it means to be a visually literate patron of the arts will be explored. A thorough introduction to the visual elements and principles of design will help students to form some guidelines for analysis and criticism in such areas as drawing, painting, photography, film, video, sculpture, architecture, crafts, environmental design, theater, dance and music.
Humanities

HUM 141: Film Language

This course is intended to engage students in analysis of the film medium, to help them relate the art of film to their lives and their language and to stimulate their appreciation of the visible world. The course includes a brief survey of film history, a study of the subject matter and bias of the documentary film and visible forms of poetry in the art film.

HUM 180: Aspiration and Dissonance--A Global Interdisciplinary Study of History, Literature and Religion

This course considers the persistent separation between humanity’s greatest ideals (defined as our “aspirations”) and the reality of history (defined as “dissonance”) through selected historical, literary, and mystical works from all over the world. This inter-disciplinary, co-taught course is designed to make the student think about the purpose and value of these aspirations, the skepticism that results from their enduring failure, and the changes that a global education may bring to this situation.

HUM 205: Latin American Studies

This course provides an overview of the Latino-American cultural heritage. Based on elements from anthropology, culture (both folk and popular), film, folklore, language and linguistics, theater and drama, and literature, the course examines various cultural traditions within Latino-American society.

Liberal Arts

ARB 101 Elementary Arabic I

This course introduces students to Arabic alphabets, articulation of sounds, basic grammar, reading and writing. Vocabulary words for cultural and social settings are introduced. Listening and speaking are emphasized in class and laboratory settings.

CHI 101: Elementary Chinese

This course introduces students to the fundamentals of Chinese Language by focusing on the development of functional competence in the four skills (listening, speaking, reading and writing), as well as Chinese cultural knowledge. Students completing this course will master Chinese pronunciation system (Hanyu Pinyin), basic Chinese Characters writing skill, basic Chinese grammar. The emphasis is placed on actual verbal communication.

HIS 251: History of Modern China

This course is an introductory study of the history of China from the seventeenth century to the present. Specifically, the course seeks to analyze how China has been able to build a dynamic and growing civilization amidst rebellion, reform, and revolution. Political, economic, and social issues will be discussed to gain a greater understanding and appreciation of Chinese civilization. Three major themes in the course will deal with imperialism, nationalism, and modernization. An effort will be made to understand the political, economic, and social “self-strengthening” experiments in China within a global perspective. The final portion of the course will examine contemporary Chinese society.

MAT 120: Modern College Mathematics

This course is designed to give students in the non-science fields an appreciation of and experience in using the concepts, logical reasoning and problem-solving techniques involved in various fields of mathematics. It fulfills the
mathematics elective for liberal arts, administration of justice, early childhood education, fire-science technology and general education majors at the College.

**RUS 101: Elementary Russian**

This course introduces students to the Russian language by focusing on the development of functional competence in the four skills (listening, speaking, reading, and writing), as well as the expansion of cultural knowledge. Students completing this course will learn about the basic structure of Russian grammar and writing as well as become familiar with elementary conversational skills.

**SOC 110: Introduction to Sociology**

The factors that determine social organization, behavior and change are considered in relation to the individual student’s own life. Study is concentrated on social intervention, culture, social class, demography, collective behavior, institutions and socialization

**SOC 240: Human Geography**

This class will look at how places and regions are interconnected, how they are unique, and how people, ideas, and things moving from one locale to another can change a place or region. After taking this class, students will view their surroundings in new ways by asking questions like: Why are peoples, cultures, and places what they are? Why are they where they are? How can geography help me understand today’s changing world?

---

**Concurrent Enrollment Courses**

As stated above, concurrent enrollment courses are Delaware County Community College courses that will be taught by Springfield High School teachers at the HS during the school day. Upon successful completion of the course, students will be awarded credit by SHS and DCCC, i.e. students will earn college credit while taking courses at SHS.

**These courses will be weighted as College Prep course weight. However, students will be awarded Honors Weight upon completion of a Capstone Project unique to each course.**

1.0 Credit       Humanities, Technologies, & Arts       Grades: 11, 12

This course examines artistic development and expression in childhood. Emphasis will be on actual artistic production, the visual language of art including the principles of design and color and on issues of aesthetics and response strategies in relation to art criticism and art history. The cognitive developmental stages of artistic growth in childhood and psychomotor skills will serve as a foundation in preparation for curriculum planning.
SHS Course # (Select CE100 if interested and notify counselor of specific course)

DCCC Course #  POL 200

World Affairs/CP  (Honors Weight awarded with successful completion of Capstone Project)

1.0 Credit  Humanities, Technologies, & Arts  Grades: 11, 12

This course deals with the theory and practice of international relations. Upon successful completion of the course, students should be able to analyze the role of power in international politics. Students will identify the major constraints a national state must deal with in the formulation and implementation of foreign policy, as well as assess the impact of the United Nations on the relations between national states in the contemporary world. Finally, students will plan developmentally and culturally appropriate strategies to address individual differences among political adversaries.

SHS Course # (Select CE100 if interested and notify counselor of specific course)

DCCC Course #  INT 100

Student Success/CP  (Honors Weight awarded with successful completion of Capstone Project)

1.0 Credit  Humanities, Technologies, & Arts  Grades: 11, 12

Student Success provides an opportunity for students to learn and adopt methods to promote their success in college. The course assists students in establishing educational objectives and increases success in achieving them. Included are the skills, behaviors and attitudes associated with success.

SHS Course # (Select CE100 if interested and notify counselor of specific course)

DCCC Course #  BIO 102

Humans and the Environment/CP  (Honors Weight awarded with successful completion of Capstone Project)

1.0 Credit  Humanities, Technologies, & Arts  Grades: 11, 12

This course provides an introduction to the study of the design of the natural world and interactions between humans and their environment. It includes an investigation of the impact of human activities on biodiversity, natural resources, availability of energy, and contamination of the environment. The scientific, economic, and social issues that contribute to environmental problems are also examined. Sustainability principles, policies, and programs are explored on the local, national and global level. This course is designed for non-science majors.
Additional opportunities through Delaware County Community College:

SWO 101: Introduction to Social Work and Human Services

This is a one semester introduction to human services and the major policies and practices that are used to understand human strengths and challenges. The course explores the skills, values and knowledge based needed to effectively work as a culturally competent, human service professional in a multidisciplinary setting.

Skilled Trades:

TCS 141 Construction First Aid/Safety

Emergency first-aid and accident-prevention instruction for construction employees and managers. OSHA requirements are stressed in this course. Administrative aspects of recordkeeping requirements, rights and responsibilities, standards, safety program development and implementation are covered. Safety training includes identification and elimination of accident and health hazards, inspection techniques and administration of first-aid and CPR. *Required for most associate’s degrees and certificates in the skilled trades (construction, plumbing, electrical, etc)

WLD 100 Introduction to Welding

Classroom instruction includes the proper selection of A.C and D.C. power sources and their applications. Oxy-fuel welding and cutting equipment and safety procedures are covered. Also discussed is proper set-up, use of GMAW and GTAW power sources and how to correctly set up and use them. All requirements and safety procedures are covered.

WLD 101 Introduction to Oxy-Fuel Welding and Cutting

Course emphasis is on fuel gases, welding, and cutting equipment.

Upon successful completion of this course, students should be able to:

• List the major advantages and disadvantages of different fuel gases.

• Maintain an oxy-fuel welding set.

• Demonstrate lighting, adjusting, and extinguishing an oxy-fuel flare.

• Use an oxy-fuel cutting torch.

Emergency & Protective Services

EMER 105: Incident Management

This course is designed to provide the student with an overview of the Incident Command-Unified Command Structure. Additionally, a look at incident management from various perspectives such as local fire departments, industrial settings, the Oklahoma City bombing, and others will be discussed. The student will work in an interactive program to prepare for future roles and responsibilities as those charged with a management role in incident command, control or mitigation. Moreover, the student will learn from the experiences of others, sharpening their understanding skills relative to the dimensions of emergency incident management.
EMS 100: Emergency Medical Technician

This intensive program is designed to instruct the pre-hospital care provider in the skills necessary to reduce mortality and morbidity from accident and illness. Topics covered include patient assessment, cardiopulmonary resuscitation, mechanical aids to ventilation, trauma management, head, neck and spinal injuries, fractures, medical and environmental emergencies, crisis intervention and vehicle rescue. *When paired with AHM 233, this results in an EMT certificate from the College.

FST 100: Introduction to Fire Protection

A course in the history and development of fire protection. Topics covered are the role of the fire service in the development of civilization; personnel in fire protection; general introduction to fire hazards; and a discussion of the problems and possible solutions for current and future fire protection.

EQUAL RIGHTS AND OPPORTUNITIES POLICY

With the aim of assuring equal rights and opportunities within our school community, and to comply with the federal laws (including Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, Title VI of the Civil Rights Act of 1964 and OCR Guidelines IV-0, State laws and State Department of Education regulations concerning same) the Springfield School District declares itself to be an equal rights and opportunities employer. As such, it does not discriminate against individuals or groups because of race, color, national origin, religion, age, sex, marital status, or non-relevant handicaps. Springfield School District’s commitment to non-discrimination extends to students, employees and the community.
